

Digital Optimization in Dentistry: DOD Exploring Digital Workflows

This event will focus on digital printing and its impact on the dental procedural workflow.

At the completion of this course, participants will be able to understand:

- 3D printing technologies
- Applications of digital printing in dentistry
- Interaction of digital printers with other dental technologies, specifically digital impression systems and CBCT imaging devices

Featured speaker

Dr. Kent K. Hironaka and his friendly staff are dedicated to providing personalized and comprehensive dental care utilizing the latest technology. Dr. Hironaka strives to create a caring atmosphere for his patients and goes the extra mile by planning and consulting with a team of specialists.

With more than 20 years experience in dentistry, Dr. Hironaka received his Doctor of Dental Surgery degree from University of California- Los Angeles. He completed training at St. Francis Medical Center and Scottsdale Center for Dental Education, where he now serves as dentist mentor. At the world renowned teaching facility, he helps train dentists in the latest technological advancements in dentistry. Dr. Hironaka's practice is especially excited to offer patients these new developments: the CEREC system to create computerized, precision-fit tooth-colored ceramic restorations in one visit without messy impressions or temporaries; and the Cone Beam 3D Digital X-rays for accurate dental implants. Both advancements together create impression-free implant teeth. All our professionals at Kent Hironaka D.D.S. maintain the highest levels of accreditation and pursue ongoing education to stay abreast of the latest trends in dentistry.
