Clarification: a rebuttal to 'The value of frenotomy for ankylo-glossia from a parental perspective'

Graham J Sharpe

I must clarify a matter raised in the rebuttal to my letter published in the NZMJ.1 The authors refer to a paper published under my name in the Sri Lankan Journal of Anaesthesiology.2 This paper was published without my knowledge. I was not involved in any part of its research, data collection, writing or publication, and I have made no claims for its authorship, such as inclusion in my CV. I became aware of it, quite by accident, some time in 2013. I accept that the authors of the rebuttal could not have known this.

Competing interests: Nil.
