

**FORGELINE**  
SOLUTIONS

## **Critical Capability in the Tactical Environment**

Forgeline designs and manufactures Berry compliant apparel systems for the most arduous tactical environments. Pioneers and leaders in material science and innovation, we purpose-build from the ground up to meet the performance needs of elite operators engaging in extreme weather and terrain.

**Equip to engage with benchmark  
thermal regulation, weather  
protection, and reliability.**

# MARS

## Cold Weather Uniform System

The MARS (Military Alpine Recce System) is a dynamic cold-weather clothing system that is engineered to extend mission duration and operational reach using airflow control to manage heat and moisture. MARS offers increased capability at the lightest weight, ensures fewer items to carry and requires minimal in-field clothing adjustments to manage.

## Next to Skin (NTS)

Products that are designed to be worn next-to-skin and utilize wool for its inherently superior properties: moisture management, odor resistance and thermoregulation.

## FLEX

A suite of products for active missions delivering PERFORMANCE and RANGE that enable the operational user to regulate personal micro-climate and extend operational reach in mild to extremely cold conditions.

## STORM

The ultimate products for static missions enabling DURATION and SURVIVAL when extreme weather conditions demand the cessation of activity and the tactical athlete requires airflow shutdown to maintain vital warmth.

## **Next to Skin (NTS)**

**Products that are designed to be worn next-to-skin and utilize wool for its inherently superior properties: moisture management, odor resistance and thermoregulation.**

# LW (Lightweight) Wool Boxer Brief

#19369

## Description

- NTS (next-to-skin) boxer brief made from a lightweight, naturally antimicrobial/odor-resistant, FR wool blend that manages moisture for superior comfort during extended-duration missions
- Use NTS as the foundation of any MARS cold weather system. Combine with FLEX products to optimize airflow control to shed excess heat and moisture during medium to high output activity. Can also be combined with STORM products during static situations that require airflow shutdown and warmth maintenance

## Materials

- 100% US sourced FR Lenzing™/wool/nylon blend

## Product Features

- Knee length
- Manages moisture, dries quickly and resists odor
- Low-bulk seam construction for next-to-skin comfort

## Weight *Spec weight of size Large*

- 94 g (3.3 oz)

## Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)

## Country of Origin:

- USA Made

## Sizes

**\$98.40**

For more information or to place an order, please email [support@forgelinesolutions.com](mailto:support@forgelinesolutions.com)

# LW (Lightweight) Wool Tech Tee

#19333 REGULAR | #19358 LONG

## Description

- NTS (next-to-skin) short sleeve shirt made from a lightweight, naturally antimicrobial/odor-resistant, FR wool blend that manages moisture for superior comfort during extended duration missions
- Use NTS as the foundation of any MARS cold weather system. Combine with FLEX products to optimize airflow control to shed excess heat and moisture during medium to high output activity. Can also be combined with STORM products during static situations that require airflow shutdown and warmth maintenance

## Materials

- 100% US sourced FR Lenzing™/wool/nylon blend

## Product Features

- Manages moisture, dries quickly and resists odor
- Low-bulk seam construction for next-to-skin comfort

## Weight *Spec weight of size Large*

- 157 g (5.5 oz)

## Contracting Standards

- Product meets Berry Amendment standards  
(U.S.C., Title 10, Section 2533a)

## Country of Origin:

- USA Made

## Sizes

**Regular \$155.45**

**Long \$168.80**

# LW (Lightweight) Wool Crew

#19332 REGULAR | #19357 LONG

## Description

- NTS (next-to-skin) long sleeve shirt made from a lightweight, naturally antimicrobial/odor-resistant, FR wool blend that manages moisture for superior comfort during extended duration missions
- Use NTS as the foundation of any MARS cold weather system. Combine with FLEX products to optimize airflow control to shed excess heat and moisture during medium to high output activity. Can also be combined with STORM products during static situations that require airflow shutdown and warmth maintenance

## Materials

- 100% US sourced FR Lenzing™/wool/nylon blend

## Product Features

- Manages moisture, dries quickly and resists odor
- Low-bulk seam construction for next-to-skin comfort
- Long-sleeved for warmth in colder conditions
- Thumb loops keep sleeves in place

## Weight *Spec weight of size Large*

- 199 g (7 oz)

## Contracting Standards

- Product meets Berry Amendment standards  
(U.S.C., Title 10, Section 2533a)

## Country of Origin:

# MW (Midweight) Wool 1/4 Zip Neck

#19301 REGULAR | #19338 LONG

## Description

- NTS (next-to-skin) zip neck shirt made from a midweight, naturally antimicrobial/odor-resistant, FR wool blend that manages moisture for superior comfort during extended duration missions
- Use NTS as the foundation of any MARS cold weather system. Combine with FLEX products to optimize airflow control to shed excess heat and moisture during medium to high output activity. Can also be combined with STORM products during static situations that require airflow shutdown and warmth maintenance

## Materials

- 100% US sourced FR Lenzing™/wool/nylon blend

## Product Features

- Manages moisture, dries quickly and resists odor
- Low-bulk seam construction for next-to-skin comfort
- Long-sleeved for warmth in colder conditions
- Collar provides protection from cold, chafing and UV exposure
- Zip-neck allows for ventilation
- Thumb loops keep sleeves in place

## Weight *Spec weight of size Large*

- 348 g (12.2 oz)

delivering PERFORMANCE and RANGE that  
enable the operational user to regulate  
personal micro-climate and extend operational  
reach in mild to extremely cold conditions.**

# ULW (Ultralightweight) Shell Jacket

#19317 REGULAR | #19348 LONG

## Description

- Extremely versatile, air-permeable wind shell that provides warmth and wind resistance while shedding moisture and heat buildup for superior comfort during high-output activities in warm to cool, variable weather conditions
- Use as a water-resistant shell over NTS (next-to-skin) products to minimize wind chill when you are on the move
- Lightweight and extremely packable

## Materials

- 100% textured nylon with a DWR (durable water repellent) finish

## Product Features

- Full-zip for easy layering
- Designed for full range of movement
- Chest pocket
- Encased elastic wrist cuffs and back hem eliminate cord management

## Weight *Spec weight of size Large*

- 139 g (4.8 oz)

## Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)
- Multicam colorway meets NIR compliance standards

# LW (Lightweight) Grid-Shell Jacket

#19310 REGULAR | #19341 LONG

MULTICAM

FATIGUE GREEN

FORGE GREY

## Description

- Air-permeable, light-thermal FLEX shell that keeps you warm and comfortable during high-output activities in cool to cold weather by shedding excess moisture and heat buildup
- Use with NTS (next-to-skin) products as a light shell; can also function as a light thermal layer paired with an air-permeable shell that uses airflow control to maintain comfort and performance
- Lightweight and extremely packable

## Materials

- Shell A: mechanical stretch grid 100% nylon fleece laminate with a DWR (durable water repellent) finish
- Shell B: 100% textured nylon with a DWR finish
- Lining: high efficiency, blended polyester/spandex (30% recycled) grid fleece
- Cuffs: nylon/spandex stretch double weave

## Product Features

- Ultrasonically welded construction with zero-bulk seams
- Composite construction:
  - Laminated panels for superior abrasion and wear resistance
  - Two-layer panel construction for a reduced acoustic signature
- Full zip for easy layering
- Designed for full range of movement
- Two front side pockets
- One chest pocket
- Stretch woven wrist cuffs and back hem band reduces bulk

## Weight *Spec weight of size Large*

- 415 g (14.6 oz)

## Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)
- Multicam colorway meets NIR compliance standards

# LW (Lightweight) Grid-Shell Pant

#19373 REGULAR | #19374 LONG

## Description

- Air-permeable, light-thermal FLEX pant that keep you warm and comfortable during high-output activities in cool to cold weather by shedding excess moisture and heat buildup
- Combine with NTS (next-to-skin) products to tailor a mission-appropriate uniform system that uses airflow control to maintain comfort and performance
- Lightweight and extremely packable

## Materials

- Shell A: mechanical stretch grid 100% nylon fleece laminate with a DWR (durable water repellent) finish
- Shell B: 100% textured nylon with a DWR finish
- Lining: high efficiency, blended polyester/spandex (30% recycled) grid fleece

## Product Features

- Ultrasonically welded construction with zero-bulk seams
- Laminated panels for superior abrasion and wear resistance
- Pull-on pant with internal soft tie at the waistband
- Designed for full range of movement
- Stretch woven gusseted crotch
- Two front hip pockets
- Streamlined cargo pocket on each thigh
- Elastic cord at bottom leg opening enables a tighter cinch
- No-bulk belt loops accommodate a military spec rigger's belt

## Weight *Spec weight of size Large*

- 322 g (11.3 oz)

## Contracting Standards

- Product meets Berry Amendment standards (U.S.C., Title 10, Section 2533a)

# High Loft Parka

#19387 REGULAR | #19388 LONG

## Description

- 100% windproof THERMAL parka with a DWR (durable water repellent) finish and maximum high-loft insulation that preserves critical body heat even when wet; designed for long duration static events in extreme cold environments
- Use on top of any product configuration for survival in stationary or low-output situations (insulation can be walked dry in an emergency)
- Lightweight and extremely packable

## Materials

- Shell: 100% textured nylon with a DWR (durable water repellent) finish
- Lining: 100% polyester
- Insulation: polyester/acrylic blend

## Product Features

- Helmet-compatible hood with elastic gather and concealed single shock cord
- Two zippered insulated front hand side pockets
- Two zippered pass-through size pockets for internal access or ventilation; internal hanger clips for arctic gloves
- Two internal drop-in pockets
- Embedded cord locks at bottom hem and hood
- Bottom hem cord adjusts into the front side pockets
- All cords concealed to eliminate snagging
- Full front zip for easy layering
- Designed for full range of movement
- Encased elastic wrist can layer over gloves or under gauntlet-style gloves

## Weight *Spec weight of size Large*
