

# EasyCash

An intelligent software solution  
designed for cash allocation

## Are you struggling with the processing of Cheques, Remittances and EFTs?

You're not alone. These operations are often manual, tedious and time-consuming, but it doesn't have to be. What if a software would do this for you?

Our EasyCash on-premise solution leverages advanced Optical Character Recognition (OCR) technology that allows for cheque and remittance key information to be extracted accurately from printed and hand-written documents. Cheques are matched to your ERP system records, and logical tests (on dollar amounts, for instance) are performed to ensure that extracted information is accurate.

## What if you could introduce a digital workforce to automate your cash application tasks?

Windmill has designed and implemented an advanced payment processing solution that offers deep automation to the repetitive manual tasks required to process cheques, remittances, and EFTs.

# EasyCash

An intelligent software solution  
designed for cash allocation

## EasyCash offers enterprise-class features, scalable to your needs.

**Cheque Processing:** Touchless extraction of key details: amount, date, account information

**EFT Processing:** Automatic extraction of payment information from a provided bank file or website

**Remittance Processing:** Touchless import of remittances, paper and other electronic forms with Windmill's Assumptive Cash Application feature:

- Automatic Extraction of Details (invoice, account number, amounts, etc.)
- Hold of remittance information waiting for payment
- Automatic Matching of payments to previous "hold" remittance
- User Interface to manually enter when "auto-matching" fails and apply payments when remittance was not provided
- Report Tool to display all aged remittances that haven't been matched

“ *EasyCash has allowed us to process payments from our customers in a quick and efficient manner allowing us to alleviate the data entry process into our ERP system. Not only we are processing cheques, but also incoming EFT's arriving at our bank accounts and matching those deposits against our customers' remittances*

- Corporate Controller- International Distributor

### Benefits of Windmill EasyCash:

- Process cheques and remittances easily, extract details automatically
- Process EFT's automatically based on your bank's transaction report
- Match transactions and export information to your accounting system
- Dramatically accelerate the processing of your payment documents
- Reduce costs, delays and error rates associated to manual processing. Most of our customers see a 75%+ reduction of keystrokes
