

Setter

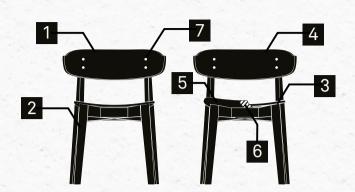

Setter by David Irwin

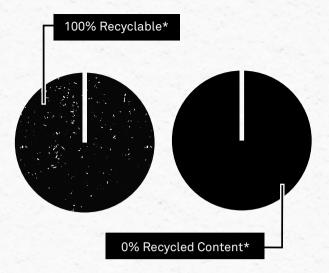

WHAT

A traditional take on a midcentury archetypal chair utilising soft materials with a comfortable armrest. WHY

Perfect for contemporary environments with a desire to use natural, lightweight materials that can be stacked and stored with ease. HOW

The components are disassemblable, making them easy to repair, reuse and recycle, whilst the design allows for a full stack, reducing the carbon footprint for transportation and storage.

MATERIAL	RECYCLED CONTENT	RECYCLABLE CONTENT
Solid Oak	0%	100%

PRODUCTIONĐakovo, Croatia

GOOD TO KNOW

- Low VOC.
- Foams adhere to the CertiPurlabel.
- * Based on Showwood model.
- **FSC (On request)
- ***Crib 5 and custom fabrics (On
- request)

These attributes can help achieve criteria towards LEED, BREEAM, Ska & WELL certifications.

Our aim is to develop a sustainable business that meets consumer needs without compromising our future welfare. Our products can contribute to the sustainability goals of a commercial project and we are proud be able to offer FSC® certified products and use recycled metals. Where sustainable sources are quoted, and a chain of custody is required, this must be indicated on the purchase order. A chain of custody requested after an order has been placed will not be possible to recover. Figures stated in the summaries may vary based on model and options selected. Recycled calculations are taken from supplier information and industry data, as such material variables are likely to affect the figures which may result in changes to these percentages. This document is subject to change without notice.
