FRANKE

OUR HISTORY

Over one hundred years of passion

Making something wonderful rarely happens overnight, and Franke has been pushing the boundaries for over 100 years. Founded in 1911, Franke was built on a foundation of precision engineering combined with traditional craftsmanship. Over 100 years later, those principles endure, while a focus on the changing needs and lifestyles of our customers has helped us become the world's largest manufacturer of kitchen sinks.

SWISS PRECISION ENGINEERING

The Franke story began as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke in 1911. Since then we've established efficient and economic manufacturing facilities all around the world.

Many things have changed in the past century, but what is always the same is a set of values, characterized by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke and continue to be at the heart of the business, as we enter a second century of smart and stunning design.

SHAPING OUR FUTURE

"We believe that sustainability means fairness to future generations"

Preserving the environment – shaping the future: As a company conscious of our responsibilities, we think and act today in the interests of the world of tomorrow. We work hand in hand with our partners, customers and suppliers to create a livable future where people can also thrive.

"We believe that sustainability means fairness to future generations" – this quote from Michael Pieper, owner of the Franke Group encapsulates our company ideals. We reconcile economics and ecology and make a proactive contribution towards sustainable development – with long-lasting products, recyclable materials and smart technologies. We use the global sustainable development goals and the United Nations Global Compact (UNGC) as a guide and framework on the path to a climate-neutral future.

Putting people at the heart of our sustainability

The foundation of our new sustainability strategy rests on the three pillars of the environment, employees and the company. When it comes to environment, we focus on the production and lifecycles of our products. As the market leader, creating reliable and innovative solutions with real added value is both a challenge and a source of motivation.

This exceptional quality enables customers to use our products for more than two decades – conserving resources in the process. We also feel an immense responsibility towards our employees, of which there are approximately 8700 around the world. Words like appreciation and trust aren't just empty phrases to us, they're deeply embedded in our company's DNA.

We help people to stay healthy and to make their professional aspirations a reality. Franke is synonymous with diversity, equal opportunities, cohesion and a company culture where people want to give their best and contribute their own ideas.

Duravit AG aspires to be a climate-neutral business by 2045

As a company with deep regional roots that has also become a global player, Duravit feels a special sense of obligation to the concept of sustainability.

- Milestone: 20 percent reduction in CO2 by 2030 compared to 2019
- Stephan Tahy, Duravit CEO: "We are in the process of questioning old certainties and investing in finding and implementing new ways of achieving a sustainable future"
