OUR HISTORY

Over one hundred years of passion

Making something wonderful rarely happens overnight, and Franke has been pushing the boundaries for over 100 years. Founded in 1911, Franke was built on a foundation of precision engineering combined with traditional craftsmanship. Over 100 years later, those principles endure, while a focus on the changing needs and lifestyles of our customers has helped us become the world's largest manufacturer of kitchen sinks.

SWISS PRECISION ENGINEERING

The Franke story began as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke in 1911. Since then we've established efficient and economic manufacturing facilities all around the world.

Many things have changed in the past century, but what is always the same is our set of values, characterised by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke and continue to be at the heart of the business, as we enter a second century of smart and stunning design.

FRANKE OWNERS

1911 to 1939

Willi Pieper
1976 to 1988

Michael Pieper
1989 to present

SHAPING OUR FUTURE

Preserving the environment – shaping the future. As a company conscious of our responsibilities, we think and act today in the interests of the world of tomorrow. We work hand in hand with our partners, customers and suppliers to create a livable future where people can also thrive.

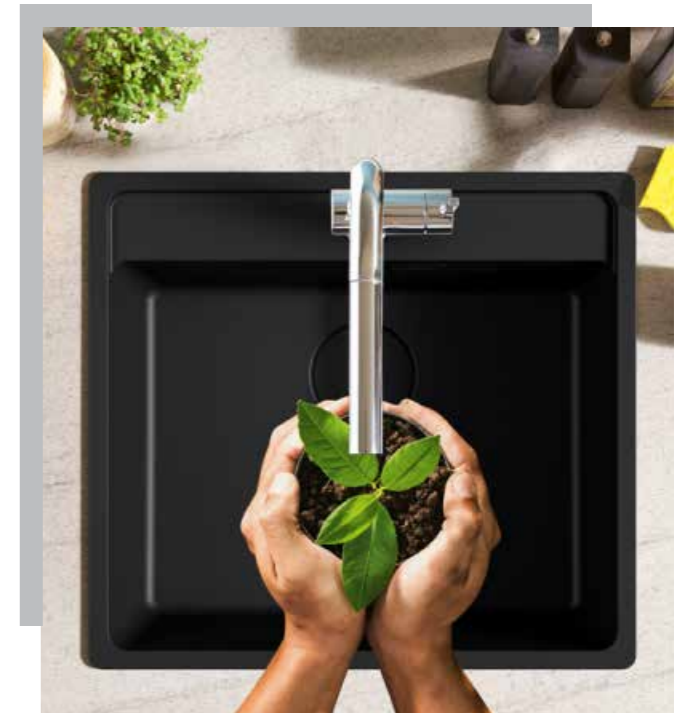

“We believe that sustainability means fairness to future generations” – this quote from Michael Pieper, owner of the Franke Group encapsulates our company ideals. We reconcile economics and ecology and make a proactive contribution towards sustainable development – with long-lasting products, recyclable materials and smart technologies. We use the global sustainable development goals and the United Nations Global Compact (UNGC) as a guide and framework on the path to a climate-neutral future.

Putting people at the heart of our sustainability

The foundation of our new sustainability strategy rests on three pillars – the environment, our employees and the company. When it comes to environment, we focus on the production and lifecycles of our products. As the market leader, creating reliable and innovative solutions with real added value is both a challenge and a source of motivation.

This exceptional quality enables customers to use our products for decades – conserving resources in the process. We also feel an immense responsibility towards our employees, of which there are approximately 8700 around the world. Words like appreciation and trust aren't just empty phrases to us – they're deeply embedded in our company's DNA.

We help people to stay healthy and to make their professional aspirations a reality. Franke is synonymous with diversity, equal opportunities, cohesion and a company culture where people want to give their best and contribute their own ideas.

Our ambition – net zero by 2040

We have clear goals that support our ambition to create a sustainable world for our customers, employees and society – for both today and tomorrow. Our vision at Franke is to become net CO₂ neutral in production by 2030, and net CO₂ neutral across the entire Franke value chain by 2040.

To accelerate our progress, we have prioritized sustainability as a strategic component that encompasses, supports, and shapes all of our Group's activities. This broader approach includes the environmental impact outside our direct operations – those generated throughout our products' lifecycles, such as materials and supply, distribution, product usage and end of life.

“We are intensifying our efforts within the Franke Group to manage our impact on environmental, social and governance matters. By setting and monitoring targets, we will be able to achieve lasting positive change.”

Patrik Wohlhauser
CEO Franke Group

GLOBAL PRESENCE

Franke has a worldwide presence, with sales and service locations in over 40 countries. Our company operates international production facilities and caters to different regional preferences, ensuring its products meet the diverse needs of customers across the globe.

AWARDS

For over 110 years, Franke Designers have prided themselves in their craftsmanship when developing high-quality Swiss-made products. Timeless yet contemporary design has remained at the forefront of innovation at Franke, a promise that has been recognised globally, with over 120 awards won.

FUTURE OUTLOOK

Franke continues to focus on growth, product development, and adapting to changing customer needs and market trends. Our company is dedicated to creating innovative kitchen solutions that improve functionality and enhance the overall user experience while maintaining its commitment to quality, design and sustainability.

ENVIRONMENTAL COMMITMENT

Franke is dedicated to minimizing its environmental impact by implementing sustainable manufacturing practices and offering eco-friendly product options. Our company focuses on energy efficiency, reducing waste and using recyclable materials in our products and packaging.

CUSTOMER SERVICE

Franke places a strong emphasis on providing excellent customer service and support. Our company offers comprehensive warranty programs and is dedicated to resolving customer concerns promptly and efficiently. Franke's customer support team is available to assist with product selection, installation and maintenance.

CHOOSING YOUR PERFECT SINK

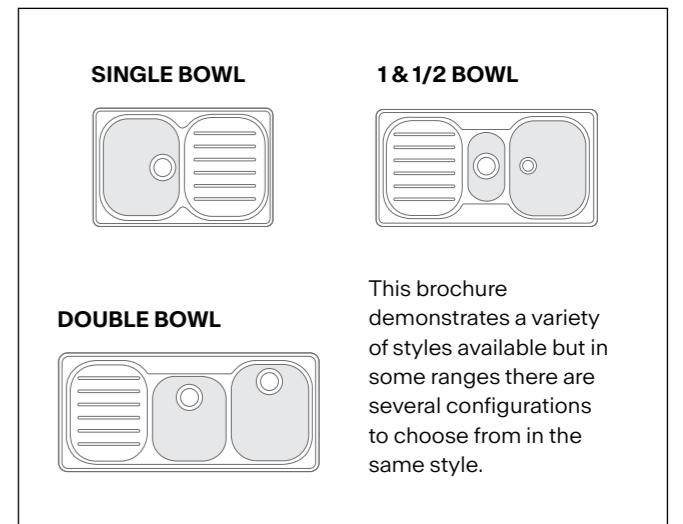

As the kitchen sink is seen as the heart of the kitchen, it's the perfect starting point for creating your dream kitchen. There are however, certain functional considerations to take into account and the following information will help to ensure that your sink is the perfect fit for your ideal kitchen.

BOWL AND DRAINER CONFIGURATION

BOWL & DRAINER CONFIGURATION

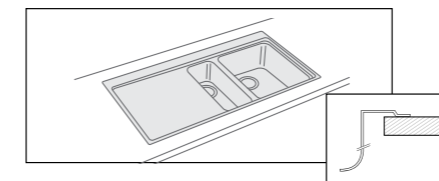

The type and position of your bowl depends on how you intend to use your sink. If you like room to clean large items like grill pans, a larger single bowl may be best for you, or for a multi-functional purpose, you may prefer the versatility of two separate working bowls.

The drainer location is also an important consideration. For many sinks you will need to choose the specific version you prefer - with drainer on the left or right hand side. Whereas other sinks are reversible which indicates the drainer can be positioned on either side.

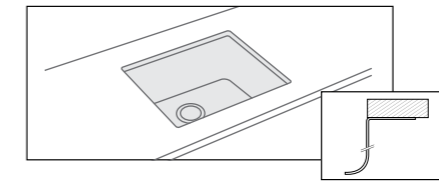

This brochure demonstrates a variety of styles available but in some ranges there are several configurations to choose from in the same style.

INSTALLATION TYPES

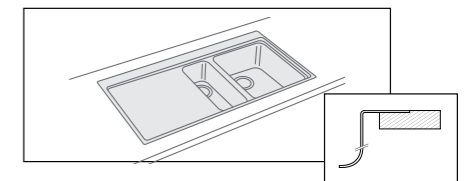

TOPMOUNT SINKS

Topmount sinks are installed from above into a pre-prepared hole in your benchtop. It gives you the widest range of sink shapes, sizes and styles to choose from.

UNDERMOUNT SINKS

Undermount sinks are installed underneath the benchtop and require a solid surface such as granite. They are not compatible with laminate benchtops.

FLUSHMOUNT SINKS

Flushmount sinks feature a single thickness edge allowing a slimfit to the benchtop which can be recessed resulting in a flush fit with the benchtop.

MATERIAL TYPES

STAINLESS STEEL

Franke stainless steel sinks are made from premium quality chrome nickel steel, which looks stunningly beautiful, is highly resistant to staining, rust and corrosion.

It's the most popular material – and for good reason. Stainless steel has a timeless quality that sits beautifully in a traditional or contemporary style kitchen, offering stunning good looks and a durability that helps keep it looking at its best for years.

FRAGRANITE

Fragranite is an exceptionally tough material containing 80% quartz and 20% resin to form a unique material with a subtle sheen that is warm to the touch.

Kitchens can be a critical location for spreading bacteria. On unprotected material, bacteria can multiply every 20 minutes making surfaces unhygienic. The integrated Sanitized® hygiene function in Fragranite sinks helps to keep this area clean and provides the sink with lasting protection.

ALL-IN ACCESSORIES

EIGHT ACCESSORIES, ENDLESS USES

The system explained - Compatible with any sink*, All-In includes:

1 TELESCOPIC BRIDGE

Featuring extendable stainless steel rails with durable handles that will adjust to fit bowls up to 540mm. Incorporates small feet that sit against the sink edge to ensure a stable fit.

2 BAMBOO CHOPPING BOARD

With feet built into its underside, the bamboo board can be positioned above the sink rim, or securely fitted onto the bridge's stainless steel rails.

3 LARGE STRAINER BOWL

Made from Sanitized material, the large strainer has holes that means it can be used as a colander for rinsing ingredients, for collecting peelings when preparing fruit or vegetables, or as a drainer for cutlery and utensils.

4 SMALL STRAINER BOWL

Also made from Sanitized material, the smaller strainer can also serve as a colander or drainer.

5 SMALL STORAGE BOX

The Sanitized small bowl can be used for collecting prepared ingredients and storing them in the fridge. Equally, it can be used for collecting peelings and dealing with waste during preparation.

6 BAMBOO BOWL LID

Placed securely on top of the small bowl, the bamboo lid can help to keep food fresh.

7 FOLDABLE SILICONE DRAINER MAT

Foldable for easy storage and with an inclined surface for use as a drainer, the pad is also heat resistant and can hold pots and pans straight from the hob or oven.

8 STORAGE CONTAINER

The soft touch storage container easily houses all the different accessories and allows you to store everything neatly in a standard kitchen cabinet.

*For bowls between 340mm and 540mm

INTRODUCING MYTHOS MASTERPIECE

F-Inox Technology

Using a physical vapor deposition (PVD) technique, F-INOX bonds a coloured film to the stainless steel surface, resulting in a sink that is 4x more resistant to scratches and easy to clean. With its anti-fingerprint and high temperature, impact, and chemical resistance, this technology is perfect for busy kitchens. Plus, its resistance to fading and discoloration ensures a long-lasting, beautiful finish.

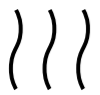

Easy to clean and dry

Hydrophobic and oleophobic

Long durability

High scratch and stain resistance

Heat proof

Boiling water resistance

Anti-fingerprint

No fingerprint marks

Franke sink ranges have a variety of optional accessories available to complete your Franke Food Preparation area. To see which accessory fits your preferred sink, please refer to their individual specification sheets available on our website prks.com.au.

FRAGRANITE

SUPERBLY HARD-WEARING

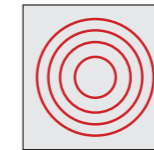

Sinks made of Fraganite are particularly elegant and bring an earthy, natural look to your cooking or preparation space. With a subtle shine and warm to the touch compared to the traditional stainless steel, the smooth surface gives the impression of beautifully water-worn stone. Composed of 80% quartz sand and 20% acrylic resin, Franke's hard-wearing Fraganite gives you a lifetime of beauty.

WONDERFUL FOR ACTIVE FAMILIES

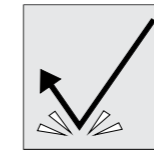

Kitchens need to be bacteria free and thanks to the Sanitized® treatment, Franke is recognized as a pioneer in the development of elegant, functional and hygienic kitchen sinkware. Sanitized® reduces the growth of bacteria on the Fraganite surface by 99%. All this and Fraganite still remains resistant to stains and high temperatures up to 280°C.
