

MONToux

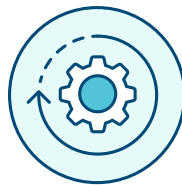

Actuarial Workflow Automation

Montoux has redefined the future of actuarial technology. Insurers no longer need to tolerate the cost, inefficiencies and inadequate outputs of legacy systems.

AI driven technology built for today's insurer

Open and flexible low code
model developer environment

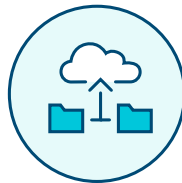

Rapid and cost effective
model runtimes

Transparent models

Automated model
reconciliation

Actuarial + Data Science models
in the same environment

Open, low cost APIs

Examples using Actuarial Workflow Automation capability

Actuarial sandbox

- Automated model reconciliation
- Flexible scenario analysis
- Data science integration
e.g. solvers optimization & model
driven assumption setting
- Rapid run times

Experience analysis automation

- Automated data retrieval,
transformation and validation checks
- Flexible slice and dice
experience analysis
- Monthly monitoring
- 1 to 3 days to execute
experience analysis

Valuation process automation

- API driven admin and external
system integration
- One-click execution of all
valuation runs
- Automated model transparency
and governance
- Granular and flexible outputs
