3. **OUR BUSINESS PURPOSES FOR COLLECTING AND SHARING PERSONAL INFORMATION**

Generally speaking, we collect and share the Personal Information that we collect for the following purposes, as we also have described in our Privacy Policy and/or our website.

Our Purposes for collecting, using and sharing Personal Information

Data marketing services, for example:

- Assisting our brand partners identify and understand their customers better by providing insights about them and managing loyalty programs, as well as providing financial and other scoring products.
- Creating data marketing tools and products for our marketer clients, as more fully described in our Privacy Policy and on our websites. This includes our rendering of datasets, data scoring, i.e., providing inferences about potential identifiers, data appends, i.e., connecting data across datasets, data hygiene services, i.e., helping customers evaluate, validate and correct personal information, as well as security and anti-fraud services, i.e., helping customers to identify potentially fraudulent activity.
- Assisting our brand partners through our Services to provide their current and prospective customers with better service generally related to the above.
- Creating identity graphs or associations between data points to help locate users across various channels, such as based on common personal, device-based, or network-based identifiers, e.g., IP address, cookie or device identifiers, and email address.

Additional marketing services, which may overlap with data marketing services above:

- Assisting in targeting and optimizing of SMS, direct mail and email campaigns, display, mobile, and social media marketing.
- Analyzing and optimizing our brand partners' (or their service providers') proprietary databases, or helping them to identify and mitigate potential fraud.
- Measuring the effectiveness of online or offline ad campaigns by determining which messages are most likely to be seen or opened by which types of consumers, or which types of ads are most likely to lead to purchases.
- Providing hygiene or verification services, which is how companies update and/or clean their databases by either verifying or removing or correcting old, incorrect, or outdated information.

Operating our Services, for example:

- Testing, improving, updating and verifying our own database.
- Operating, analyzing, improving, and securing our Services.
- Developing new products.

Other internal purposes, for example:

For internal operations, auditing, research, detecting security incidents, debugging, short-term and transient use, quality control, and legal compliance.

We sometimes use the information collected from our own website, from social networks, from other business to business interactions, e.g., trade shows, or from data compilers for the above, as well as for our own marketing purposes.

4. YOUR CALIFORNIA RIGHTS AND CHOICES

Without being discriminated against for exercising these rights, California residents have the right to request that we disclose what personal information we collect from you, to delete that information, and to opt-out of the sale of your personal information, subject to certain restrictions. You also have the right to designate an agent to exercise these rights on your behalf. This section describes how to exercise those rights and our process for handling those requests. To the extent permitted by applicable law, we may charge a reasonable fee to comply with your request.

Sometimes, we act only as a “service provider” to our brand partners (for instance, if they provide information to us for analytics, processing or other data management services), in which case any consumer requests for opt-out, deletion or access to data must be made through that client. In such cases, we will forward any such requests to a named partner, as feasible.

1. Right to request that we do not sell your personal information

You may request that we not sell your personal information. If you wish to make such a “do not sell” (also called an “opt out” request), please go to our “Do Not Sell” web form located at <https://www.getgobot.com/ccpa-form>. Alternatively, you may contact us by email at max+privacy@getgobot.com. When you make such a request, we will retain your information to the extent necessary so as to enable removal of your data from our active database in the event we obtain it again at a later date.

2. Right to request deletion of your personal information

You may request that we delete any personal information that we collected from you, such as if you have been a customer of ours. Note that this is different from your right to “opt out” of us selling your personal information, which is described above (also note that we do not generally collect personal information directly from consumers). You may make a deletion request by emailing us at max+privacy@getgobot.com. In our discretion, we may interpret your “deletion” request as a “Do Not Sell” request, if we in good faith believe that is what you are requesting.

However, we may retain personal information for certain important purposes, such as (a) to protect our business, systems, and users from fraudulent activity, (b) to address technical issues that impair existing functionality, (c) as necessary for us, or others, to exercise free speech or other rights, (d) to comply with law enforcement requests pursuant to lawful process, (e) for scientific or historical research, (f) for our own internal purposes reasonably related to your relationship with us, and/or (g) to comply with legal obligations. Additionally, we need certain types of information so that we can provide our Services to you. If you ask us to delete it, you may no longer be able to access or use our Services.

3. Right to request access to your personal information

California residents also have the right to request that we disclose what categories of your personal information that we collect, use, or sell. As a California resident, you may also request the specific pieces of personal information that we have collected from you. You may make such an “access” or “right to know” request by emailing us at max+privacy@getgobot.com. We may withhold some personal information where the risk to you or to others’ privacy rights is too great to disclose the information.

For security purposes (and as required under California law), we will verify your identity - in part by requesting certain information from you - when you request to exercise your California privacy rights. For instance, if you request specific pieces of personal information we have received about you, you may need to confirm your possession of an identifier, e.g., an email address, which reasonably confirms you are the person you claim to be.

4. Right to nondiscrimination

We will not deny, charge different prices for, or provide a different level of quality of goods or services if you choose to exercise these rights.

5. Right to “opt-out” of the sale of your personal information

California residents may opt out of the “sale” of their personal information. California law broadly defines what constitutes a “sale” - including in the definition making available a wide variety of information in exchange for “valuable consideration.”

6. Information about persons under the age of 16

We do not knowingly collect personal information from minors under 16 years of age in California unless we have received legal consent to do so. If we learn that personal information from such California residents has been collected, we will take reasonable

steps to remove their information from our database or to obtain legally required consent.

7. Authorized agents

You may also designate an agent to make requests to exercise your rights under CCPA as described above. We will take steps both to verify the identity of the person seeking to exercise their rights as listed above, and to verify that your agent has been authorized to make a request on your behalf through providing us with a signed written authorization or a copy of a legally sufficient power of attorney. We likewise may require that you verify your own identity, depending on the type of request you make.
