

#### **Application Instructions**

The following provides instructions for completing your CPCoE Research Proposal Application. Please also familiarize yourself with the CPCoE Funding Guidelines.

If you have any questions, please contact CPCoE: research@vcp-vdc.ca.

#### **General Instructions**

Please follow these instructions when preparing and submitting your application. Note: applications that do not adhere to these instructions will not be considered for funding.

- CPCoE uses an e-mail application process. Your completed application and required attachments must be sent via e-mail to <a href="research@vcp-vdc.ca">research@vcp-vdc.ca</a>.
- Principal Applicants can only apply to one funding opportunity per competition.
   Principal Applicants are not permitted to apply to multiple funding streams within the same competition. If you do, CPCoE will automatically withdraw the last application submitted according to the most recent submission date.
- Applications may be submitted in English or French.
- The total number of pages of the application must not exceed 5 pages for applications written in English (6 pages for applications written in French), excluding cover letter, budget, CVs, and references. The application must be prepared using Times New Roman size 12 font with single spacing and margins must not be less than 2 cm (3/4 inch) on all sides.
- Carefully read the specific instructions for each section of the application (see subsequent pages). All sections must be completed.
- All cited work must be fully referenced and be numbered consecutively in the order they are cited in the text using Arabic numbers in parentheses (Vancouver style) and included in a full reference list at the end of the proposal.
- It is your responsibility to ensure your application is complete prior to submission.
- Submit your application before the deadline specified in the Funding Opportunity. The deadline for submitting your application to calls for research proposals is 11:59pm EST on the deadline date indicated in the call announcement. The deadline is 11:59pm EST on the stated deadline date.
- Read and sign the "Consent and Submit" page (see last page).

# Required Attachments

At the time of application, Principal Applicants will be required to attach the following to your e-mail submission, in addition to your application. Note: These are only required for the Principal Applicant.

Certificate for Sex and Gender-Based Analysis Plus (SGBA+) training

Certificate for "Patient Engagement Training Course: A How-to-Guide for Patient
 Engagement in Research" Modules 1-4 provided by the Canadian Institute of
 Health Research (CIHR) Institute of Musculoskeletal Health and Arthritis (IMHA)

#### **Specific Instructions**

Please follow these instructions when preparing each section of your application and utilize the template <u>here</u>.

# Main Contact Information (Include in Cover Page; Excluded from Application Page Count)

Provide the name, institution name, telephone, and e-mail for the Principal Applicant (PA). Please let CPCoE know if the PA requires any communications accommodations.

# **Research Funding Opportunity**

Identify the CPCoE research funding opportunity you are applying to.

Note: All proposals will be administratively reviewed to ensure alignment with the objectives of the specified funding opportunity. Proposals that do not align clearly with the specified funding opportunity will NOT be adjudicated and will NOT be eligible for funding. The CPCoE will NOT re-assign proposals to any other funding opportunity, regardless of applicability. Please ensure you specify the correct funding opportunity for which your proposal is being submitted to.

Research Project Title (Include in Cover Page; Excluded from Application Page Count)
The project title should be short and reflect the content of the project and objectives.

Note: If awarded, CPCoE will use this title in all official correspondence, and will request a lay title.

Scientific Abstract (Include in Cover Page; Excluded from Application Page Count) Include a concise summary of the proposed research and how it addresses the objectives of the respective Funding Opportunity.

## **Background and Rationale**

Provide a brief overview of relevant background information and/or rationale for your proposed research. Indicate what the need is for your project, and how you have identified this need. Include a focused literature review highlighting the gaps in existing knowledge that you will address, including references of cited work using numerical

referencing. Ensure that you have clearly identified the research question(s) that you intend to answer.

Where appropriate, include details of how you consulted with Canadian Veterans and their families, healthcare professionals, and/or other relevant stakeholders about the need for doing this research.

#### Objective(s)

Indicate the broad goal(s) and specific research aims of your proposed research, and a clear explanation of how they fit the objectives of the Funding Opportunity. Your objectives(s), general and/or specific, should sum up the overall purpose of your project

It is important to highlight how your project will contribute to improving the lives of Veterans, and their families, living with chronic pain.

## Methods

Describe the design of your project. Describe your methodology and the justification for that choice, including any sample sizes / number of participants and how this was decided; data collection; measurement methods; and analysis. You should also include the demographic details that you plan to collect, the change mechanisms that will be assessed, and the outcome measures that will be collected. Any subsequent calculations, such as power analysis or other relevant tests or proofs of concept, should also be included.

#### Procedure/study design

Please indicate the type of study that will be conducted (e.g., descriptive, correlational, causal-comparative, cross sectional, longitudinal, randomized clinical trial, qualitative, etc.). The use of a flowchart is acceptable.

Note: If awarded, CPCoE will require ethics approval, or proof of exemption from ethics, for your project.

#### Participants

Indicate the number of participants, demographic details, sample size calculation (if indicated), inclusion end exclusion criteria, etc.

## Data collection

Indicate the method of data collection that will be used and the specific outcomes/tools (e.g., surveys, questionnaires, interviews, focus groups,

observations, records and documents, clinical tests, etc.) including their metrological qualities (if known), and if these tools are publicly available. If your research proposal is a qualitative study, be sure to provide sufficient detail to the reviewers for them to appreciate the rigour of the proposed methods.

Note: Participants must be given the opportunity to participate in their official language of choice, English or French. This pertains to all aspects of participation, including in-person interviews. Please include any translation costs in your budget. Additional funds will not be provided for translation.

## • Outcomes measures / variables

List and briefly describe all outcome measures and/or variables that will be used.

## • Analysis

Include type of analysis performed for each objective listed above Note: Explain how the research project will address Sex and Gender-Based Analysis Plus (SGBA+) considerations, including, but not limited to: factors of: i) sex, ii) gender, iii) age, iv) disability, v) geography, vi) culture, vii) income, viii) sexual orientation, ix) education, x) race, xi) ethnicity and/or xii) religion.

#### **Expected Outcomes/Impact**

Enumerate the expected outcomes of the proposed research, highlighting its significance and how it will advance knowledge and/or its application to healthcare for Veterans, health systems, and/or health outcomes. Describe the reasonably anticipated benefits to Canadian Veterans, and their families, living with chronic pain as a result of your research.

### **Veteran Engagement**

At the core of the CPCoE's research is the principle of Veteran engagement. In addition to including Veterans as participants who voluntarily elect to participate in surveys, interviews, and trials, the CPCoE strongly encourages researchers to include Veteran Partners. While engaging veterans in a CPCoE application is not mandatory at this time, engaging veteran partners is central to increasing the relevance and potential impact of your Research Proposal Application. Veteran Partners are key members of the research team involved in meaningful and active collaboration to shape and execute research from the onset of projects. Please refer to CPCoE's <u>Veteran and Researcher Partnership Guide</u> for further information.

Please describe how Canadian Veterans, and/or their families, living with chronic pain have been (or will be) involved in the development of your project. This includes but is not limited to: providing perspective from lived experience, consultation on research design, engagement strategies with potential participants, and/or helping make knowledge mobilization activities more applicable. Applicants should articulate how they plan to work with Veteran(s) (i.e., communication, hours of work, role within the team, workflow, etc.), specify the skills and knowledge required of those Veteran(s), and indicate their expected level of involvement (patient partner, co-lead. etc.).

Note: When Veterans and their family members Partner in research, the CPCoE requires that they receive honoraria for their time and contribution. If you plan to incorporate Veteran Partners, ensure you have included honoraria in your budget. See the CPCoE recommended standardized honoraria for Veteran/family Partners involved in research and KM activities in the Budget section below.

## **Feasibility**

Are the timelines and related deliverables of the project realistic?

Where applicable, consider adding potential threats to the success of your research (e.g., number of eligible participants required to recruit, ethics approval deadlines, regulatory approvals, development of tools or questionnaires, etc.), and how you plan to mitigate them.

Indicate and explain any experience that the members of your research team, or their organizations, have with managing similar projects that could enhance the realization and success of the study.

### **Knowledge Mobilization (KM)**

Explain the research project's Knowledge Mobilization (KM) plan, both during the project and at the end of the project, to effectively disseminate research findings. Describe how you will make the information from your research useable and accessible to Veterans, and their families, living with chronic pain, healthcare professionals, health administrators, and/or other Knowledge Users. The KM plan should include details regarding target audiences, goals, strategies to achieve those goals, knowledge products, and evaluation metrics. Depending on the nature of the study, it may be relevant to identify an integrated KM strategy where, besides veteran partners, other key stakeholders such as as clinicians, health administrators or policy makers, may be integrated within the research work.

KM is an important component of CPCoE research funding. CPCoE requires the following KM items at the conclusion of all projects. Ensure you incorporate these items in your budget:

- o A 1-2 page plain language (lay) summary; and
- o 1-2 knowledge products, in addition to publications and conference presentations/posters, tailored for knowledge users that are co-created with the CPCoE's KM team and relevant knowledge user groups. Examples of knowledge products can include: evidence briefs, infographics, videos, webinars, workshops, etc. More examples can be found <a href="here">here</a>. In addition, the CPCoE will provide further KM information via webinar or video.
- Ensure you plan for how you will involve Veteran/family Partners, or members of other Knowledge User groups, in KM planning and/or products, as identified above.

<u>Note</u>: CPCoE requires open access publishing. Please include any open access fees in your budget. Additional funds will not be provided for open access fees.

<u>Note</u>: KM products must be available in both English and French. Please include any translation costs in your budget. Additional funds will not be provided for translation.

#### Research Team

It is important that members of the research team cover all the expertise required (disciplines and methodologies) to carry out the project (e.g., clinical expertise relevant to the target clientele, or methodological expertise in methodology relevant to a study to validate measurement tools).

Provide the full name, contact information, and unit of affiliation of all individuals who will be involved in the project, and their specific role (Principal Applicant, Co-Principal Applicant, Co-Applicant, Collaborator, Veteran and/or Family Member Partner, etc.). Further definitions are provided below:

- Principal Applicant (PA): author of the intellectual content of the application submitted. The PA is responsible for the overall direction of a research project and all proposed activities, including meeting the reporting requirements.
   Principal Applicants must hold an academic position in an affiliated Canadian institution, or an internationally recognized academic institution.
  - Principal Applicants must be able to independently hold research funds (e.g., like a CIHR grant) at their institutions.

- Similar to tri-agency funding, Investigator salary <u>is not an eligible expense</u> for CPCoE funding. CPCoE funding may be used for operating costs, including remuneration for research professionals, trainees, or consultants.
- Non-Canadian Principal Applicants and Co-Applicants are eligible to apply.
   Note: For all applications, it is expected that at least one Investigator and one Veteran Partner be Canadian to help ensure Canadian relevance and support building Canadian research capacity for all CPCoE funded projects.
- Co-Principal Applicant (Co-PA): co-author of the intellectual content of the submitted application who shares the responsibility for the overall direction of the research project and all proposed activities with the PA. This is an individual who is expected to actively participate in the proposed activities, but not to direct them. This may include individuals with academic positions or individuals outside of academia with relevant expertise.
- **Collaborator:** individual whose role is to provide a specific service (e.g., access to equipment, provision of specific reagents, training in a specialized technique, statistical analysis, access to a patient population, etc.).
- A Veteran / Family Member Partner is an individual with lived experience (i.e., a Canadian Veteran, or their family member or caregiver, living with chronic pain, who is actively contributing to the development of the research).

## **Budget (1 Page Maximum, Excluded from Application Page Count)**

Provide a detailed budget in relation to planned activities and clearly justify all budget items in Canadian dollars. The budget should take into consideration any anticipated changes over the course of the project.

Complete the budget using the below chart, as follows:

- Please apply with the budget that best fits your project. Indicate the amount required in each budget category, as well as a comprehensive description of what the funds will be used for, to justify the amount requested.
- As a Qualifying Not-for-profit Organization and Charity, CPCoE strongly discourages institutional overhead wherever possible. Where institutional overhead is necessary, include it in your budget. Additional funds will not be provided for institutional overhead.
- Include Honoraria for Veteran/family Partners involved in research and KM activities. CPCoE recommends the following standardized Honoraria:

Every hour: \$50.00

Half day (3.5 hours): \$200.00Full day (7 hours): \$400.00

- Similar to Tri-Agency funding, Investigator salary is not an eligible expense for CPCoE funding. CPCoE funding may be used for operating costs, including remuneration for research professionals, trainees, or consultants.
- All applications resulting from this research must be published open access.
   Include any open access publishing fees in your budget.
- Include any translation costs related to project participation and resulting KM products.

## **Budget**

Item	Description	Amount
Research staff		
All research staff required for the		
research and corresponding		
technical needs.		
Trainees		
Costs related to the training and		
mentoring of trainees, students		
and knowledge users.		
Participants		
(Recruitment, Honoraria, etc.)		
Consumables		
A list of items such as materials		
and supplies, services, travel		
necessary for conducting research,		
etc. and justifiable rationale.		
Non-consumables		
A list of equipment and related		
operating/maintenance costs.		
Equipment is defined as any item		
(or collection of items) of		
nonexpen <mark>da</mark> ble tangible property,		
having a <mark>use</mark> ful life of more than 1		
year, us <mark>ed</mark> wholly or in part for		
research. Maintenance and		
operating costs of equipment are		
also eligible.		
Knowledge Mobilization		
Costs associated with		
disseminating your research		

results, such as: manuscript		
publication, conference		
presentations/posters, travel,		
other knowledge products (e.g.,		
evidence briefs, infographics,		
videos, etc.).		
Other		
Costs associated with other		
expenses for research not covered		
in the above categories.		
Financial / In-kind Partners		
List any funding from partners		
(cash and/or in-kind support) that		
you have secured or expect to		
secure. Enter the partner's		
financial contribution or estimated		
value in the In-Kind column for		
each year. You may describe how		
the contribution from the partner		
will be used towards the proposed		
research project.		
	TOTAL*	
*Including Overhead, but excludin		

# CV (Excluded from Application Page Count)

Include an updated abbreviated CV for the Principal Applicant and Co-Applicants (CIHR Biosketch CV, or equivalent, is acceptable).

## References (Excluded from Application Page Count)

All cited work must be fully referenced and be numbered consecutively in the order they are cited in the text using Arabic numbers in parentheses (Vancouver style) and included in a full reference list at the end of the proposal.

Note: to maintain equality across applications, any additional, non-required appendices that are included in the submission will not be considered during the formal adjudication process.
