MARCH 2024

DIRECTOR NEWS

CLASSROOM NEWS

2 Day: Our 2-day friends have been thinking about expressing their love to their families, and we will continue this theme of love by sharing our kindness with animal friends and classmates. We look forward to making animal treats, filling our classroom kindness jar, and reading some great books about characters who model kindness.

3 Day: The 3-day class has been diving deep into numerous sensory play activities. Did you know that when children participate in these activities, they are developing the pathways in their brains that help them with complex problem solving? Other benefits are fine and gross motor skills, language development, cognitive growth and social skill development. The calming and organizing effects are also evident as Ms. Erika and I are successfully managing our high-spirited classroom community.

4 Day: The 4-day class enjoyed continuing the around the world unit with Asia after break. We will continue to dive into other cultures by exploring Africa and Australia next!

Afternoon: In February, the afternoon crew learned a lot about Owls! In March, we will start to explore the wonders of Maple Sugaring! We'll even get to tap a REAL SUGAR MAPLE TREE!

STEAM: We have been exploring color in the classroom to prepare for us to explore color **outside** of the classroom! We are excited to expand our learning in the classroom to the outdoors.

Hello families!
We hope that everyone had a wonderful February break! We have been enjoying the warm days and exploring outside with the kiddos.

Summer camp registration for current or alumni families is live NOW! Everyone should have received an email with the sign-up link, if not please look on the website.

SPOTLIGHT

This month we say goodbye to the 4-Day snake friend, Karl! It has been so much fun watching him!
