

# TXT-II PACKER

The Tier 1 TXT-II is a high pressure rated service packer ideal for all types of operations requiring pressurized injection.

The TXT-II is a compression set packer with hydraulically activated upper slips that engage when tubing pressure exceeds the annular pressure above the packer. Once equalized the packer is simply unset with a straight pick up on the tubing string.

The TXT-II is utilized in applications such as hydraulic stimulation, cement squeezes, and high-pressure acidizing. The robust and field proven design combined with the three-element packing system ensure reliability and high-performance.

## CURRENT SIZES

- ⇒ 114.3mm – 244.5mm  
(4.5" – 9.625")

## STANDARD OFFERING

- ⇒ Right-hand set
- ⇒ Nitrile elastomers
- ⇒ P-110
- ⇒ EUE

## OPTIONS

- ⇒ Left-hand set
- ⇒ Premium / semi-premium connections

## FEATURES & BENEFITS

- ⇒ Extensive run history proving reliability and longevity
- ⇒ Large internal bypass area to maximize running and circulating rates
- ⇒ Multiple hydraulic activated hold-down slips to ensure high-pressure injection performance
- ⇒ Quarter-turn set/straight pick-up release providing ease of operation regardless of deviation

## APPLICATIONS

- ⇒ Service operations
- ⇒ Cement squeezing
- ⇒ Fracturing
- ⇒ Acidizing
- ⇒ Pressure testing
- ⇒ Vertical / Deviated / Horizontal
