

May 19, 2019

Dear registrant,

This letter is being sent to registrants of patient advocacy foundations for syndromic autism. We are conducting a study with the purpose to determine the frequency and severity of sensory processing symptoms in individuals with syndromic autism compared with other children. The research will be conducted at Baylor College of Medicine with affiliation to Texas Children's Hospital.

For the study, we will ask you to complete a survey either in person or by phone which will take approximately 15 minutes. To complete the survey the Principal Investigator (PI) or a member of their research staff will ask you the total of 34 questions, and you will report the frequency with which these behaviors occur. This research is voluntary and you or your child can drop out of the survey at any time without penalty to their healthcare.

If you have any questions about this study or would like to participate, please contact the research staff,

Maria McCormack, Research Coordinator II
1250 Moursund St., Suite 925
Houston, TX 77030
Phone: 832-824 8775
Email: maria.mccormack@bcm.edu

If you are not interested in participating, please feel free to disregard this letter.

Thank you for your consideration.

Sincerely,

Jimmy Holder, MD, PhD
Assistant Professor of Pediatrics
Baylor College of Medicine
