Halo collection

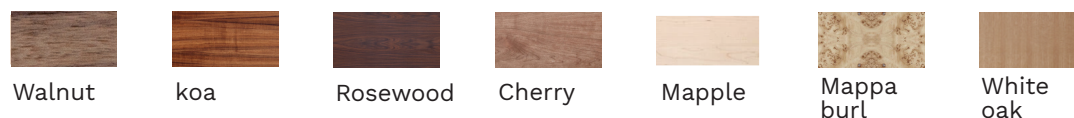

Halo 01

Initially conceived to be installed as a bedside cabinet, Halo 1 could easily serve as an entryway console or a side table in the living room. Built without legs for a floating effect, it can be easily attached to the wall with the provided brackets (*See installation guide*)

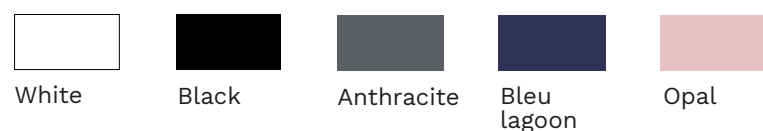

The round wooden insert in the top of the console is a detail proper to all cabinets that are part of the "Halo" collection. Furthermore, Halo 1 boasts a wooden handle sculpted in the solid wood façade (maple, White oak, cherry or walnut). The façade can be left in the chosen solid wood or veneered over with a choice of veneers. This choice will also be used for the veneer of the typical Halo 1 wooden insert on the cabinet top. The cabinet itself is offered in 5 solid colors permitting combinations suited for any decor. Worth noting, the dovetail assembly of the solid maple drawer is synonymous of quality craftsmanship. It is installed on a hidden slow closing quality drawer slide.

* Please note that natural variations in wood colors make each piece a unique piece.
