Halo collection

Halo 02

With its modern and minimalist design, Halo 2 Can be used as a dresser in the bedroom or as a sideboard cabinet in the living or dining room.

The round wooden insert in the top of the cabinet is a detail proper to all cabinets that are part of the "Halo" collection. It matches the drawer façades and is available in seven different wood species. The case comes in five different solid colors allowing combinations to suit a multitude of decors. Worth noting, the dovetail assembly of the solid maple drawers is synonymous of quality craftsmanship. They are mounted on quality touch latches slides that also feature slow closing.

Halo 2 can be installed without legs as a floating cabinet and can be easily attached to the wall with the provided brackets (See [installation guide](#)). A leg assembly can also be purchased for a more traditional freestanding look.

** Please note that natural variations in wood colors make each piece a unique piece.*
