

MARINE CRANES

Palfinger Marine is one of the world's leading manufacturers of innovative lifting solutions for use in the maritime field. Palfinger Marine provides lifting and handling solutions to all major maritime segments, including offshore, marine, cruise, navy, coast guard

and wind. The company is known to supply high-quality products to fulfill standardized and customized demand with a network of more than 5,000 sales and service centres located in over 130 countries across all continents.

story

Offshore cranes from Palfinger Marine stands for trouble-free operation in the most extreme conditions. Tailor-made for the harsh offshore environment, they combine low power consumption with high performance. All components are placed as low as possible to ensure a remarkably low weight and low center of gravity. In combination with high lifting capabilities, this leads to a maximized cargo capacity on deck.

Like all Palfinger Marine products, offshore cranes are tailor-made to meet individual requirements. They are delivered in various configurations and range from small to large models and special systems. Rugged design made by experienced engineers who relies on bondura® pin technology, ensures trouble free operation under the most extreme conditions.

benefits

- Minimized maintenance and repair cost
- Minimize downtime
- Increased operational reliability
- Safer operation
- Higher precision by eliminating wear & tear
- Timesaving installation and handling
- Compensates bore tolerances
- Increased equipment lifecycle
- Easy inspection and service procedures
- DNV GL-type approved solution
