Electronic Signature Point of Sale (EMV Compatible)

ScriptPro®

ScriptPro partners with VeriFone to provide pharmacies a robust and user-friendly payment card processing solution with the enhanced security features available with EMV/Point-to-Point Encryption (P2PE).

Integrated with ScriptPro's SP Central Point of Sale System, Electronic Signature Point of Sale securely processes credit, debit, and FSA/HSA card transactions*. The large touchscreen display allows patients to request counseling and sign for payment, as well as sign forms (HIPAA acknowledgement and other customized pharmacy forms supported). Signatures are electronically recorded and easily retrievable for audit purposes.

Patients appreciate the easy-to-read and intuitive design, while pharmacy staff values the time-saving electronic signature capture and integrated card processing. And, the device's enhanced security is appreciated by everyone!

The Importance of Implementing EMV

- In October 2015, payment card processors shifted liability to merchants that had not transitioned to the EMV standard. EMV is an enhanced security framework that defines payment interaction between chip cards and payment devices; EMV stands for EuroPay, MasterCard, and Visa.

- EMV reduces a merchant's liability in the case of payment card data being misused, lost, or stolen from its facility.

- When properly configured, Electronic Signature Point of Sale enhances card data security by complying with SAQ-P2PE standards. P2PE provides merchants with strong cryptographic protection of payment card data from the point it is used at a payment terminal until that data reaches the secure point of decryption.

- Electronic Signature Point of Sale also supports Near Field Communication (NFC) payments such as ApplePay and Google Wallet.

Other Data Security Details

- SP Central does not store cardholder data (CHD) within logs, database, or otherwise; system memory is scrubbed of CHD after being transferred to VeriFone PAYware (connection is encrypted via SSL).

- ScriptPro's Payment Card Sub-System (PCSS) is PA-DSS certified (PA-DSS v5.3).

- VeriFone PAYware is compliant with PCI v4.x.

*Card processing functionality dependent upon card processor; see list of supported card processors on back and contact ScriptPro for more information on each processor's ability to support credit, debit, FSA, HSA, and EMV transactions.

Features and Benefits

- Fully integrated, PCI-compliant payment card processing

- EMV compatible and complies with SAQ-P2PE standards

- Large touchscreen presents easy-to-read forms and supports signature capture

About ScriptPro

We create innovative, seamlessly-integrated robotics and workflow systems that optimize pharmacy services. As patient care progresses from inpatient to outpatient and long-term care settings, the need for advanced systems to support medication therapy is evolving. Our solutions include strategic planning and financial management services that help health systems succeed in a dynamic and financially challenging environment.

Specifications*

Weight: A. Electronic Signature Point of Sale: 2.0 lbs. (0.91 kg)
B. Counter Mount: 1 lbs. (0.45 kg)

Electrical Input: 12W, 12-24VDC, power pack input requirements: 100-240VAC, 50/60Hz

Computer/Software: PCI Approved, SIGIS Certified; Electronic Signature Point of Sale requires one SP Datapoint per unit.

Display: 7" WVGA (800 x 480), capacitive touchscreen, Corning® Gorilla® Glass technology

Card Reader: Triple track bi-directional MSR

Contactless: ISO14443 A&B, MiFare, ISO18092 capable, EMVCo L1 and L2 certification, supports major NFC/ contactless schemes.

Temperatures:
Operating: 32°F to 104°F (0°C to 40°C)
Storage: 0°F to 150°F (-18°C to +66°C)
Humidity: 15–95%

Electronic Signature Point of Sale includes:
- One Electronic Signature Point of Sale
- One PAYware Point license**
- One Key Injection for encryption (debit cards)

Standard Features: Stylus – field replaceable

Security: PCI PTS 4.x approved

Supported Credit Card Processors: Elavon, First Data, Global Payments – East, Heartland Payment Systems, TSYS
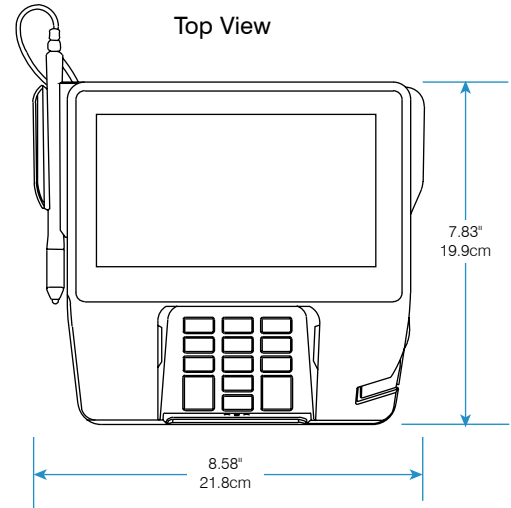

Installation: Optional Counter Mount that includes four screws is available for purchase in the ScriptPro Supplies Catalog.
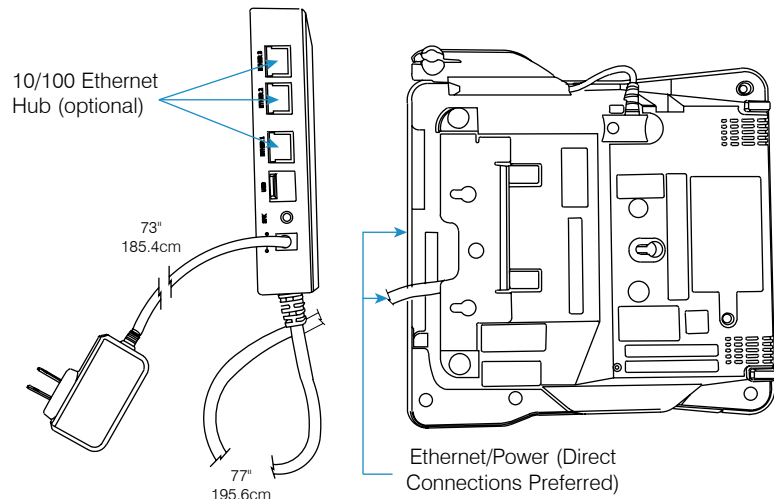

Specifications subject to change without notice.

**Point of Sale Client License Add-On (one PAYware Point license) is available for purchase separately. Requires SP Datapoint.*
