

MedsOnCue Interface

ScriptPro's interface with MedsOnCue by VUCA Health gives your patients on-demand access to the MedsOnCue patient education videos for their prescription medications.

These easy-to-understand videos are available by simply scanning the QR Code printed on the Prescription Label or Rx Receipt* with a smart phone or other device capable of scanning a QR code and connecting to the internet. Videos are offered in English and Spanish and provide comprehensive information on top-prescribed medications, including proper usage, expected benefits, and potential side effects.

The best part is that it's available at no cost to ScriptPro customers.**/**

How it Works

1. Scripts are processed using the pharmacy's standard workflow; no manual intervention is required to print the QR code.
2. Based on the prescription medication, ScriptPro prints the QR Code on the Prescription Label or Rx Receipt; embedded within it is a web URL specific to the MedsOnCue patient education video.
3. Scanning the QR Code invokes playback of the educational video specific to the patient's prescription medication.

Try it!

**Printing QR Code on Rx Receipt requires SP Central Pharmacy Management System.*

***MedsOnCue Interface available for ScriptPro Automation, SP Central Workflow System, and SP Central Pharmacy Management System customers at current software maintenance minimum of 7.18.36/8.0, 10.16.79+, and 12.24+ respectively. Upgrade and implementation fees may apply.*

****MedsOnCue service must be contracted through VUCA Health.*

Additional Value-Add Services through MedsOnCue

In addition to on-demand videos, MedsOnCue includes three customizable services designed to reinforce patient relationships, enhance patient safety, and cultivate brand loyalty:

Connect Me – Click-to-call access to client-designated pharmacies or healthcare organizations call centers

Remind Me – Streamlined registration with the pharmacy's or healthcare organization's medication alert and reminder program

Inform Me – On-demand access to additional prescription information and health/wellness resources

About ScriptPro

We create innovative, seamlessly-integrated robotics and workflow systems that optimize pharmacy services. As patient care progresses from inpatient to outpatient and long-term care settings, the need for advanced systems to support medication therapy is evolving. Our solutions include strategic planning and financial management services that help health systems succeed in a dynamic and financially challenging environment.
