

SP Central Pharmacy Management System

SP Central Pharmacy Management System provides customers the industry's most advanced prescription processing system. It is fully integrated with ScriptPro robotics, IVR, mobile apps, inventory management, point of sale, third party contract management, and clinical and specialty programs.

It offers a highly configurable DUR component, easy to understand pricing controls, automatic coordination of benefits, multiple-language SIG support, Refill Reminder management, Long-Term Care MAR/PO form printing, and robust reporting with 100+ reports and forms.

SP Central Pharmacy Management System base elements are as follows:

SP Central Pharmacy Management System Software: Provides state-of-the-art, pharmacy system functionality presented in a user-friendly, graphical display.

SP Central Expanded Server (Rackmount): Comprised of a 1U Primary Server and 1U Secondary Server. The Secondary Server can be configured to perform image storage and data backup processes or, for maximum redundancy, can remain in cold mode when a fully dedicated SP Central Backup Server and SP Central Image Server are purchased.

SP Datapoint: Touchscreen-enabled workstation handles all facets of prescription processing. When combined with an SP Printer, it is capable of printing hard copy, pick list, and prescription labels, etc.

Features and Benefits

- Queues electronic prescriptions and selects patient, prescriber, drug, etc., for data entry staff
- Selects the dispensed drug NDC, including generic substitutions, based on written drug DAW code and inventory center
- Automatically tracks and resubmits claim for Refill Too Soon prescriptions
- Displays image of prescriber's signature for validation
- Tracks and logs all operator activities from Script Data Entry to prescription Dispense
- Integrates with ScriptPro's drug database, ensuring accurate product data via automated updates
- Automates inventory management functions via Electronic Data Interchange (EDI) with suppliers

About ScriptPro

We create innovative, seamlessly-integrated robotics and workflow systems that optimize pharmacy services. As patient care progresses from inpatient to outpatient and long-term care settings, the need for advanced systems to support medication therapy is evolving. Our solutions include strategic planning and financial management services that help health systems succeed in a dynamic and financially challenging environment.

SP Central Pharmacy Management System

The following are components* of a broad scope, fully integrated SP Central Pharmacy Management System:

SP Central Pharmacy Management System

- SP Central Pharmacy Management System Software
- SP Central Expanded Server (Rackmount)
- SP Datapoint
- SP Printer
- Script Scanner

Integration with Point of Sale

- SP Central Point of Sale System
- SP Central Point of Sale Package
- Electronic Signature Point of Sale

Integration with IVR

- SP Central Interactive Voice Response

Integration with Automation

- CRS, CRS 150, CRS 225, SP 50, SP 100, SP 200, SPUD, Mini SPUD, SPace, SPace 200

Mobile Apps

- PharmacyPro Mobile Dispense Module
- PharmacyPro Mobile Point of Sale Module
- RefillPro

Script Ready Notification

- Notice Board & Notice Board XL

340B Programs, Contract Pharmacy, and Specialty Pharmacy

- 340B Management Package
- Contract Pharmacy Management System (CPMS)
- Advanced Pharmacy Clinical Services (APCS)

Multi-Store Operations

- SP Central Enterprise Server

Remote Access to SP Central and Other Applications

- SP Central Remote Access Server
- SP Central Terminal Emulation & Terminal Services
- SP Central Global

Interface with Other Applications and Systems

- Standard Interfaces – Patient, Prescriber, Orders, Order Status, Provider, Billing, Payroll Deduction, Surescripts, SP Central Database Export, etc.
- CoverMyMeds
- Eyecon
- MedsOnCue
- Custom Interfaces – Give us a call

Training: Up to ten Full Time Equivalent (FTE) training days included with original lease/purchase of SP Central Pharmacy Management System. Approx. five FTE days for Training and Setup, and approx. five FTE days for Go-Live and Support. One "FTE" day is defined as one trainer on-site for one day for up to 10 hours. If more than one trainer is on-site, it is counted as multiple FTE days.

**See individual product sheets for specifications; specifications subject to change without notice.*
