

SP CENTRAL WORKFLOW SYSTEM

PROMOTING SAFETY AND PRODUCTIVITY

SP Central Workflow System provides centralized prescription and data processing for ScriptPro's integrated robotic and workflow solutions. The unified client/server architecture offers maximum scalability to handle any workload.

"My goal with automation was to manage volume without adding employees, and to relieve stress on my current staff. With our SP 200 and SP Central Workflow, we fill more prescriptions with the same number of employees, but our days are less stressful! All the system's safety features have increased our accuracy – we leave each day with confidence that we have dispensed accurately."

— Peter Koo, RPh, Owner,
Starside Drugs, Flushing, NY

Giving You Control

SP Central tracks 100% of the prescriptions in your pharmacy – whether robotically or manually filled. Gain real-time access to the “who, what, when, where, and why” of every prescription you process. Order management is streamlined with SP Central's unique ability to group an order by patient or drug. Barcode controls ensure increased safety and dispensing accuracy. The system stores prescription processing data and electronic signatures for prescription dispensing. HIPAA compliance forms are provided and all electronic signatures can be easily retrieved.

SP Central efficiently handles exceptions, tracks authorizations, and batches prescriptions. Inventory and will call management are streamlined, while detailed reporting provides operational insight to maximize staff productivity and support superior patient services.

WHAT MAKES SCRIPTPRO DIFFERENT?

Commitment

100% focused on providing unsurpassed technology that addresses the needs of ambulatory and retail pharmacy settings.

Our Track Record

Thousands of satisfied customers worldwide.

Customer Service

All-inclusive “bumper-to-bumper” 24x7 coverage for a fixed monthly payment.

Reliability

Documented uptime of 99.46%.

Implementation

Site planning and professional installation and training.

Safety

Robotic dispensing processes are free of drug particle emissions and cross-contamination. Positive barcode verification at every step. Security options help reduce shrinkage.

Responsibility

It's all under one roof; we design, sell, manufacture, install, and support all of our systems.

SP CENTRAL **WORKFLOW** SYSTEM

"SP Central Workflow tracks prescriptions from the moment they enter the system to the moment they are dispensed, allowing us to quickly locate them. It also helps with audits – before, we'd spend hours preparing paperwork! Now, because SP Central scans and stores everything electronically, we can be prepared in mere minutes."

— Jessie Morgan, RPh, Outpatient Pharmacy Manager,
University of Louisville Hospital Outpatient Pharmacy, Louisville, KY

SP Datapoint — Compact, interactive countertop unit for filling, verifying, dispensing, and tracking prescriptions. Managers and supervisors can access and control pharmacy operations, local or remote.

SP Printer — Prints labels with clear and legible fonts, barcodes, and detailed drug image line drawings.

Script Scanner — Scans and stores electronic images of hard copy prescriptions. Images are then available at any step of the prescription filling process.

Robotic Prescription Dispensing System — Delivers up to 150 filled and labeled vials per hour. Universal dispensing cells with on-site calibration handle all tablets and capsules, with no drug cross-contamination. Six robot sizes available.

Storage and Retrieval System — Provides pharmacies with the most advanced and secure will call management solution in the industry. It utilizes a patented single-step process to store prescription will call bags and extends the chain of control over medications until they are dispensed to the patient.

Notice Board — Notifies patients when prescriptions are ready for pickup. Display can be configured to meet pharmacy preference and privacy requirements.

Electronic Signature — Records signatures for prescription pickups, HIPAA forms, and program participation elections. It is configurable for custom forms and notices.

ADDITIONAL PRODUCTS

Pharmacy Services Portal

ScriptPro Inventory Management

PharmacyPro

Communications Module

Pharmacy Services Portal — Enterprise-capable hardware and software solution provides self-service patient pharmacy check-in services, ticket queuing, and patient/prescription/ticket integration.

ScriptPro Inventory Management — Provides real-time inventory tracking, order generation, electronic transmission, and receiving. It automatically downloads supplier catalogs and offers robust reporting on utilization, order savings opportunities, and more.

PharmacyPro Mobile Dispense Module — Gives you the freedom to print a delivery manifest, deliver prescriptions to patients' doorsteps or hospital bedsides, and capture signatures. All dispensing information is transmitted back to SP Central in real time.

Communications Module — Automatically sends pickup reminders and shipping notification text messages to customers. Configurable settings allow pharmacy staff to control message content and when messages are sent.

Operate your entire pharmacy with ScriptPro software and robotics.
Our end-to-end pharmacy solutions power the business of healthcare.
