

ARCHITECTURAL

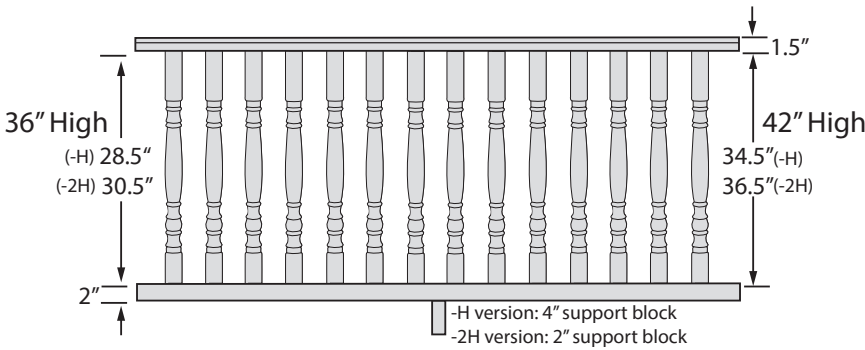

BENEFITS

- Easiest installation in the industry — faster, with better results, and saves labor
- Contoured top rail — 1.5" eased-edge square balusters
- True-to-length (6' = 72" of railing to fit a true 6' opening)
- Aluminum reinforced top and bottom railing (all sizes)
- Specific testing info (exceeds IRC requirements at 10'/IBC requirements at 8')
- Straight sections include spring-loaded locking baluster (extra safety feature)
- Total solution — gates kits, post wrap, angle adapters, load-bearing porch posts and designer and solar cap options help you finish the job
- Fully-kitted (top/bottom rail + aluminum inserts, balusters, support block, brackets and stainless steel hardware) in one box — easier to source
- Proudly manufactured in the USA with virgin PVC
- "No-miter stair bracket" — cleaner, simpler and faster installation
- Better curb appeal — white railing is egg-shell/semi-gloss, resembles painted wood
- Limited-lifetime warranty
- More sizes = more capability and smarter purchasing

ARCHITECTURAL

Box includes factory-routed aluminum reinforced rails, balusters, rail brackets, hardware, bottom support block and installation instructions. Post, post mounting brackets, post caps and decorative collars are sold separately.

	Height	Length
Straight	36", 42"	4', 6', 8', 10'
Stair	36"	4', 6', 8'
