Statement

by the Board of Directors and the Executive Board

Tofthøj, 28 February 2023

The Board of Directors and Executive Board have today considered and adopted the Annual Report of Idavang A/S for the financial year 1 January – 31 December 2022. The Annual Report has been prepared in accordance with International Financial Reporting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act.

In our opinion, the Consolidated Financial Statements and the Parent Company Financial Statements give a true and fair view of the financial position at 31 December 2022 of the Group and the Parent Company and of the results of the Group and Parent Company operations and cash flows for 2022.

In our opinion, Management's Review includes a true and fair account of the development in the operations and financial circumstances of the Group and the Parent Company, of the results for the year and of the financial position of the Group and the Parent Company as well as a description of the most significant risks and elements of uncertainty facing the Group and the Parent Company.

In our opinion, the Annual Report of Idavang A/S for the financial year 1 January - 31 December 2022 with the file name *IDAVANG-2022-12-31-en.zip* is prepared, in all material respects, in compliance with the ESEF Regulation.

We recommend that the Annual Report be adopted at the Annual General Meeting.

Report On The Audit Of The Financial Statement

Our Opinion

In our opinion, the Consolidated Financial Statements and the Parent Company Financial Statements give a true and fair view of the Group's and the Parent Company's financial position at 31 December 2022 and of the results of the Group's and the Parent Company's operations and cash flows for the financial year 1 January to 31 December 2022 in accordance with International Financial Reporting Standards as adopted by the EU and further requirements in the Danish Financial Statements Act.

Our opinion is consistent with our Auditor's Long-form Report to the Audit Committee and the Board of Directors.

What we have audited

The Consolidated Financial Statements and Parent Company Financial Statements of Idavang A/S for the financial year 1 January to 31 December 2022 comprise income statement and statement of comprehensive income, balance sheet, statement of changes in equity, cash flow statement and notes, including summary of significant accounting policies for the Group as well as for the Parent Company. Collectively referred to as the "Financial Statements".

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional

requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the Auditor's responsibilities for the audit of the Financial Statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark. We have also fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

To the best of our knowledge and belief, prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No 537/2014 were not provided.

Appointment

We were first appointed auditors of Idavang A/S on 25 May 2020 the financial year 2020. We have been reappointed annually by shareholder resolution for a total period of uninterrupted engagement of 3 years including the financial year 2022.

Emphasis of matter

As mentioned in note 2 Critical Accounting Estimates and Judgements Russia's "special military operation" into Ukraine results in uncertainties related to assessing the future control of - and potential writedowns - of the Russian activities.

Without modification of our opinion, we refer to note 2 for description of the uncertainties.

Key Audit Matters

In addition to matter described in the Emphasis matter section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the Financial Statements for 2022. These matters were addressed in the context of our audit of the Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Independent Auditor Report

to the shareholders of Idavang A/S

Key audit matter

Fair value of commercial and breeding herd

The Group's biological assets in terms of commercial and breeding herd are measured at fair value less selling costs at the balance sheet date. At 31 December 2022 the fair value of the Group's herd amounts to EUR 40.099 thousand (2021: EUR 26.982 thousand)

The Group applies a model includes data on number of pigs, quotations and prices from recognized markets and assumptions on necessary adjustments appropriate for the local markets.

We focused on the measurement of fair value because the model applied for determining the fair value is complex and involves significant judgements, as local prices are not available in all relevant markets for the various stages in the production from piglets to slaughter pigs and from young females to sows.

We refer to note 15 in the Consolidated Financial Statements.

How our audit addressed the key audit matter

We evaluated and tested the appropriateness of the Group's model for determining the fair value of the herd throughout the stages of the production.

We tested the Group's model for consistency with previous years.

We challenged the assumptions applied in the model with reference to historical data and external documented quotations and sales prices based on age, weight, breed and genetic heritage, where applicable.

We evaluated the appropriateness of the related disclosures provided.

Statement on Management's Review

Management is responsible for Management's Review.

Our opinion on the Financial Statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the Financial Statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Moreover, we considered whether Management's Review includes the disclosures required by the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Consolidated Financial Statements and the Parent Company Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

Management's Responsibilities For The Financial Statements

Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with International Financial Reporting Standards

as adopted by the EU and further requirements in the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities For The Audit Of The Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

Independent Auditor Report

to the shareholders of Idavang A/S

As part of an audit in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent

Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group or the Parent Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that gives a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Consolidated Financial Statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to

communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and, where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter.

Independent Auditor Report

to the shareholders of Idavang A/S

Report on compliance with the ESEF Regulation

As part of our audit of the Financial Statements we performed procedures to express an opinion on whether the annual report of Idavang A/S for the financial year 1 January to 31 December 2022 with the filename *IDAVANG-2022-12-31-en.zip* is prepared, in all material respects, in compliance with the Commission Delegated Regulation (EU) 2019/815 on the European Single Electronic Format (ESEF Regulation) which includes requirements related to the preparation of the annual report in XHTML format and iXBRL tagging of the Consolidated Financial Statements including notes.

Management is responsible for preparing an annual report that complies with the ESEF Regulation. This responsibility includes:

- The preparing of the annual report in XHTML format;
- The selection and application of appropriate iXBRL tags, including extensions to the ESEF taxonomy and the anchoring thereof to elements in the taxonomy, for all financial information required to be tagged using judgement where necessary;

- Ensuring consistency between iXBRL tagged data and the Consolidated Financial Statements presented in human-readable format; and

- For such internal control as Management determines necessary to enable the preparation of an annual report that is compliant with the ESEF Regulation.

Our responsibility is to obtain reasonable assurance on whether the annual report is prepared, in all material respects, in compliance with the ESEF Regulation based on the evidence we have obtained, and to issue a report that includes our opinion. The nature, timing and extent of procedures selected depend on the auditor's judgement, including the assessment of the risks of material departures from the requirements set out in the ESEF Regulation, whether due to fraud or error. The procedures include:

- Testing whether the annual report is prepared in XHTML format;
- Obtaining an understanding of the company's iXBRL tagging process and of internal control over the tagging process;

- Evaluating the completeness of the iXBRL tagging of the Consolidated Financial Statements including notes;

- Evaluating the appropriateness of the company's use of iXBRL elements selected from the ESEF taxonomy and the creation of extension elements where no suitable element in the ESEF taxonomy has been identified;

- Evaluating the use of anchoring of extension elements to elements in the ESEF taxonomy; and

- Reconciling the iXBRL tagged data with the audited Consolidated Financial Statements.

In our opinion, the annual report of Idavang A/S for the financial year 1 January to 31 December 2022 with the file name *IDAVANG-2022-12-31-en.zip* is prepared, in all material respects, in compliance with the ESEF Regulation.

Group Chart

Above group chart shows only operational entities. All group enterprises are 100% directly or indirectly owned by Idavang A/S. Please see Parent Company Note 8 on page 70 for details.

Revenue for the Idavang group was EUR 115.2m in 2022 against EUR 100.2m in 2021. EBITDA was EUR 30.2m against EUR 14.6m (at fixed herd prices – see below in table, it was EUR 21.8m against 2021 of EUR 14.4m), and profit after tax was EUR 15.7m against EUR 2.4m in 2021.

EUR'000	2022	2021
Operating profit as per profit and loss	22,251	7,497
Depreciations	7,992	7,132
EBITDA	30,243	14,629
Value adjustment biological assets (reversed)	-8,430	-271
EBITDA at fixed herd prices	21,813	14,358

EBITDA at fixed herd prices reflects that the normal EBITDA has been adjusted for the unrealized value adjustments related to the biological assets required by IFRS.

In Q1 2022, Ostrov farm in Russia received the first pigs for the repopulation. First sales normal sales happened in November. Hence, production volume in Russia during 2022 have been 29 MT, which is 26% below normal volume. In Lithuania, production was unchanged at 55 MT compared to 2021.

The Lithuanian sales prices have increased significant twice during 2022, but as sales prices were below cost prices in the beginning of the year, prices have only during the year increased above EBITDA cost price.

The extended period where sales prices have been below production cost prices, have continued the reductions in EU herd seen in 2021. The last two years have been historical in relation to how much production have been reduced in Northern Europe, and expectation is that reductions are going to continue in 2023.

Example of reduction of production is Germany and Poland is down with 18%/21% over two years and 11%/12% during 2021.

In Russia, supply and demand balance, with a slight oversupply. Idavang does not expect the government to introduce subsidy programs to increase production further. As construction prices of new stables are not justified by cash flow, no significant expansion is expected. Therefore, reasonably sales prices in the following years are expected.

Overall, these market developments have led to significant increase in sales price (to 1,42 EUR/kg) for the whole year compared to 2021 (+36% in Lithuania and +22% in Russia).

Although feed average prices were 25% higher than in 2021 (effecting negative with EUR 15.0m), the underlying market increases have been even higher, which was migrated by hedging efforts.

Field activities had normal harvest in 2022, nevertheless prices were below 2021 (EBITDA EUR 4.4m), similar to 2021 (EUR 5.2m).

The group invested EUR 4.4m in 2022, which is significant less than the depreciation of EUR 8.0m. This is due to investment stop in Russia from end February.

The equity on 31st December 2022 amounted to EUR 61.7m at an equity ratio of 39% (27% 2021). The equity increased with EUR 22,0m partly due to stronger RUB (EUR 5,6m) and strong result in 2022 especially due to write up of the herd with EUR 8,4m.

Net interest-bearing debt (NIBD) decreased to EUR 66.5m in 2022, being EUR 12.0m lower than in 2021 (78.5 mEUR). Nevertheless, the following need to be considered EUR 4,8 from hedging transactions which will be included in EBITDA in 2023. Idavang has almost three years duration with the EUR 75m bond left, hence having very stable financing.

Vision

Our vision is to achieve and maintain the highest quality of pigs while strictly adhering to all ethical and environmental standards.

Mission

Our mission is to be the top producer of pigs in the Baltic states and North Western Russia, renowned for high quality pigs produced in accordance with top ethical and environmental standards.

We strive to be an important and dependable partner to our clients, an actively benevolent member of the surrounding communities, an employer who provides an exciting and appealing workplace environment while offering our employees personal and professional development opportunities, as well as steady career possibilities.

Management's Review

Core Activity

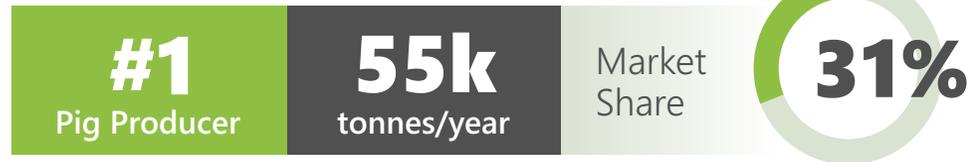

Idavang's core activity is the production and sale of high-quality slaughter pigs and weaners in Russia and Lithuania.

Idavang specialises in both brown field and green field pig production projects in Lithuania and Russia.

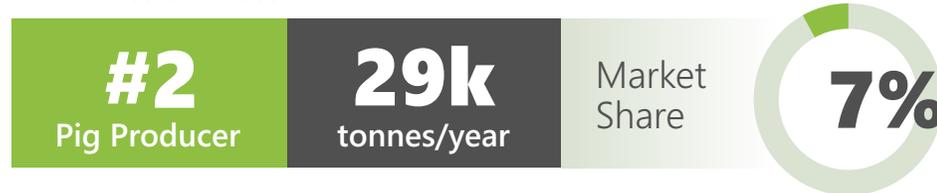

We acquire and invest in larger production sites. We refurbish the facilities and renew the technology and knowhow with the companies well-developed production solutions. Production sites are within a reasonable geographic area to enhance synergies.

Key Market Facts

Lithuania

North Western Russia

Historical Development

- 1999 ● Idavang A/S started operating the first farm Šalnaičiai (Lithuania) with an initial investment of EUR 800 thousand.
- 2002 ● Rupinskai farm was acquired; in total, 3,000 sows were held.
- 2006 ● Mūša, Sajas and Kalvarija farms were acquired, and the production volume exceeded 11 kMT by 2005. Idavang paired off with IØ Fund (Danish Government) in Lithuanian operations from 2001-2005.
- 2008 ● Activities were expanded to Russia as Farm Vostochny (Idavang Agro LLC) was acquired and reached a total of 6,600 sows the next year.
- 2010 ● Skabeikiai, Lekėčiai and Pasodėlė farms were bought, bringing sows in operation up to 19,000.
- 2011 ● Construction of Farm Idavang Ostrov, a green field farm, began in Russia and in Lithuania Joniškis, Šeduva and Šešupė farms were acquired. Furthermore, the International Finance Corporation (part of World Bank Group) became a Idavang A/S shareholder.
- 2013 ● Russian expansion continued. Farm Ostrov went into operation, and field operations increased significantly.
- 2014 ● Construction of biogas sites in Lithuania in cooperation with Modus Energy and establishment of contracting in Poland. Idavang Lithuania started to use as a boars station.
- 2017 ● Idavang Group issues re-financing using a EUR 85m bond.
- 2018 ● Bond was listed on Nasdaq and construction on Luga site in Russia started.
- 2019 ● Luga slaughter pig stables in operation, and Berzai farm was rented in Lithuania to reduce contracting in Poland.
- 2020 ● Refinanced 85 mEUR bond with 75 mEUR bond and reduced share capital with 20% by acquiring IFC shares.

Knowledge Resources

Idavang produces commodities in an international, competitive environment.

One of the only ways we can secure our position as market leader in regard to productivity and quality is to retain our employees, develop their skills and enable them to constantly improve.

Business Model

Lithuania

Lithuania, our focus is on pig production within brown field projects, as it utilize our core competencies and superior efficiency in pig production.

Sales is made weekly auctioneering of slaughter pigs for the best possible prices based on demand and supply in the Lithuanian and Polish market.

Production, utilize our core competencies and superior efficiency in pig production.

> Sourcing of feed component is done predominantly from a limited number of larger local agricultural companies, to which we have long relations.

> Manure is sold to local farmers as fertilizer instead of cultivating the fields, but Idavang spread most of it on the farmer's fields to secure the correct handling.

Russia

Russia, our focus has an extended value chain as it include farmland, grain production and pig production in both green field and brown field projects.

Sales is made weekly auctioneering of slaughter pigs for the best possible prices based on demand and supply in the Leningrad and Pskov Oblast market.

Production, utilize our core competencies and superior efficiency in pig production.

> Grain production on own fields supply significant part of feed removing dependency on Russian Farmers. Sourcing of remaining of feed is done from a number of medium and larger agriculture companies predominant in Russia.

> Manure is used on own fields as fertilizer, but some part is also supplied to local farmers for their fields as fertilizer.

	EBITDA	22 217	1,600
	EBITDA fixed herd prices (excl. value adjustment)	14 041	1,441

Lithuania accounted for
63%
of Group revenue in FY2022 (54% in FY2021).

EBITDA fixed herd prices reflect that the above EBITDA has been adjusted for the unrealized value adjustment related to biological assets.

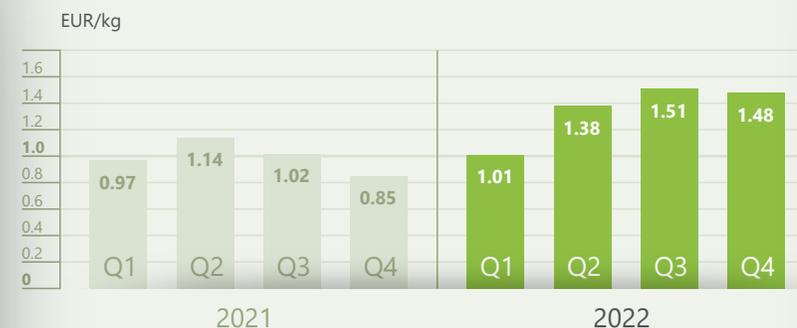

The EBITDA fixed herd price for 2022 amounted to 14,041 kEUR, corresponding to an EBITDA margin of 19.2% (2021: 1,441 kEUR and EBITDA margin 2.7 %). Hence, the EBITDA fixed herd price increased compared to 2021 of EUR 12,6m.

The sales price increased 36 % compared to 2021 to an average 1,35 EUR per kilo slaughter pigs' live weight in 2022 (2021: 0,99 EUR per kilo live weight slaughter pigs) with an effect of EUR 18,8m, whereas higher feed prices impact negative (with EUR 7.9m). Cost per kg. (excluding feed) increased 7% compared to 2021.

Idavang Lithuania did during 2022 receive one-off subsidies to support meat production in difficult times of 5,1 mEUR.

EBITDA	8 712	13,655	
EBITDA fixed herd prices (excl. value adjustment)	8 458	13,543	

Russia accounted for **37%** of Group revenue in FY2022 (46% in FY2021).

EBITDA fixed herd prices reflect that the above EBITDA has been adjusted for the unrealized value adjustment related to biological assets.

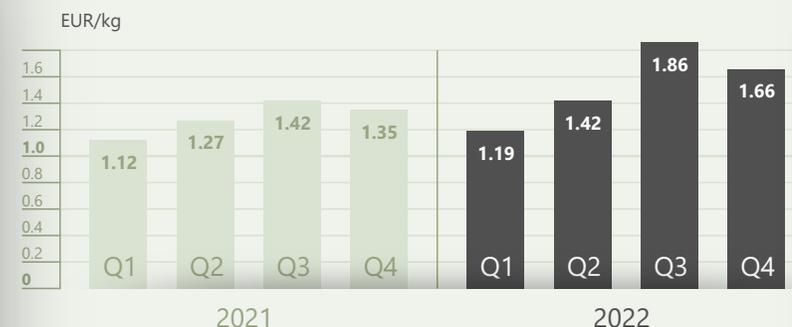

The EBITDA fixed herd price for 2022 amounted to 8,458 kEUR, corresponding to an EBITDA margin of 20.0% (2021: 13,543 kEUR and EBITDA margin 29.3 %). The EBITDA fixed herd price decreased compared to 2021 of EUR 5,1m is negatively influenced by limited production in Ostrov.

The sales price increased 22 % compared to 2021 to an average 1,56 EUR per kilo slaughter pigs' live weight in 2022 (2021: 1,28 EUR/kg) with a positive effect of EUR 7,4m, whereas higher feed prices impact negative (with EUR 6.8m), and lower volumes negative (EUR 1,3 m) – but more compared to full production as 2021 also missed Q4 in Ostrov.

Feed prices increased 33% in 2022 (with effect of EUR -6.8m), driven especially by price increases in Q1/Q2. Furthermore, grain and rape prices reduced significant in Q3/Q4, hence harvest result is decreased (with EUR 0.8m).

Live weight sales price

Russia

Feed price

Russia

Revenue

Revenue increased from EUR 100.2 m to EUR 115.2 m (15%). The change comprise of higher prices EUR 26,2m and a decrease of EUR 11.2m was due to lower volume. The lower volume mainly due to Ostrov had limited sales in Q4 whereas it had 8 months of sales in 2021.

Weaners Russia - Price / Unit	-	-	45	49

Herd value adjustment

In 2022, the fair value adjustment for herd is driven by the increasing prices in EU and comprised EUR +8.4m. Therefore, the adjustment mainly consists in increase in Lithuania with EUR +8.2m.

Production cost

Production costs increased by EUR 6.4m to EUR 104.7m from 98.3m (6.5%), but when all cost relating to Ostrov insurance case in 2021 (EUR 6,1m) has been reversed the increase is EUR 12,5m.

The increase was mainly due to the following four factors:

- Feed cost impacted production cost with EUR -9.5m – an increase compared to 2021 equals 15.1% (volume is -8.2% and price 25.3%)
- General higher cost level partly due to 28% stronger average RUB in 2022 compared to 2021 (Russia variable and fixed cost was EUR 19,7m excluding feed in 2022) and general inflation.
- Increases in energy was highest increase with 79% higher (EUR -2,1 m).
- Field impacted positive (partly due to higher prices) with EUR -0.8m
- The change in herd compared to 2021 is EUR +5.1m (EUR 4.0 m in 2022 vs. EUR -1.1m in 2021), this is driven by repopulation of the Ostrov herd.

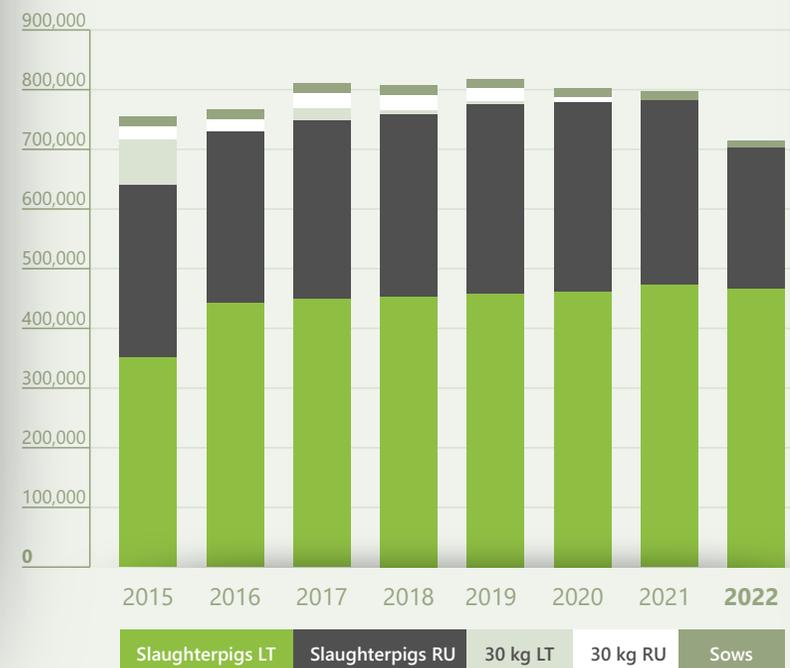

Grant

The Government level of direct subsidies for meat and grain (excluding interest subsidies) is

significant higher in 2022 (EUR 5.3m) due to support for meat producers in Lithuania compared to 2021 (EUR 2.1m mainly COVID subsidy). Furthermore, the harvest result includes grants of EUR 0.4m, similar to 2021 (EUR 0.2m).

The interest subsidy structure is so that the subsidy goes directly to the bank from the government, and the bank then provides loans with lower interest instead. Hence, it is not subsidy.

Product mix

Outlook 2023

The company expects an EBITDA at fixed herd prices for 2023 around EUR 23-25m, supported by Ostrov production is expected to operate almost normal in 2023.

- Lithuanian EBITDA (at fixed herd prices) is expected to be between EUR 10-14m (with last 7 years being 8,5 mEUR)
- Russia EBITDA (at fixed herd prices) is expected to be between RUB 1,2-1,3b (with last 7 years being 1,0b if corrected for Ostrov ASF repopulation)

Meat prices

Sales price is expected to be higher than in 2022, but a potential weaker RUB will decrease this.

- Lithuanian sales price is expected to increase with 15-25% from 2022 level of 1,35 EUR/kg
- Russian sales price is expected to be stable/increase 0-5% from 2022 level of 107 RUB/kg

Feed price

Feed price is expected to be higher than in 2022, but a potential weaker RUB will decrease this.

- Lithuanian feed price is expected to increase with 5-10% from end 2022 level of 0,319 EUR/kg
- Russian feed price is expected to be stable from end 2022 level of 20 RUB/kg

EURRUB exchange rate

Management expects the EURRUB to continuously become higher during the year, and is expect the 2023 average of the EURRUB to be in the high end of the range 75-90 (average in 2022 was 69 with a monthly average range of 57-105).

Follow-up on 2022 outlook

The EBITDA fixed herd price 2022 (EUR 21.8m) was higher than historical average 2021 (EBITDA EUR 19.9 m) not as expected, this was nevertheless primarily due to the significant subsidies received in Lithuania (EUR 5.1m), hence normal operations without the one-off subsidies were as expected.

Therefore, when adjusting for the subsidy of EUR 5,1m the EBITDA would be EUR 16,7m, or exactly on midpoint of expectation of EUR 13,0-19,9m.

Meat prices

EU/Lithuania average prices for 2022 were significantly higher than expected with 1,35 EUR/kg, and fulfills the management expectations of being above 2021 (0,99 EUR/kg).

Russian average prices for 2022 were significantly higher than expected with 1,56 EUR/kg, and fulfills the management expectations of being above 2021 (1,28 EUR/kg). This was nevertheless mainly driven by the stronger RUB exchange rate.

Feed price

Feed price was higher than 2021 as expected with 311 EUR/T compared to 244 EUR/T (in 2021), the level is nevertheless also impacted by the very strong EURRUB political exchange rate.

EURRUB exchange rate

EURRUB has in 2022 been highly volatile, but also impacted by that European Central Bank (ECB) 1st Marts 2022 stopped to publish FX rates on EURRUB (last 117,20) and European banks in general have making transactions in EUR.

The fluctuation of monthly averages (57-105), but peaks have during March reached 150.

The annual average (from the Russian central bank) ended with 69, which is significant below the expected range of 83-90. Nevertheless, management consider the exchange to be political created by Russia and not market denominated, but has used it for the annual report in lack of better alternatives (as no published FX rates from ECB).

Current Risks (I)

Fluctuations in prices of pork	Russian international political risk and Russian legislation risk	Emerging market risk is increasing in Russia	Fluctuations in prices of raw materials
<p>As pork is a global commodity, global supply and demand influences prices in all markets to a higher or lower degree, Idavang mitigates this by focusing on markets where there is an undersupply of pork.</p> <p>Thereby, we compete with producers in other markets, which need to transport the pork to North Western Russia or Lithuania.</p>	<p>Political tension and international sanctions against Russian interest have increased continuously after "special military operation" into Ukraine started in February 2022, negatively impacting the Russian economy.</p> <p>It is expected that full impact of current sanctions, have not been seen. Hence, the total negative impact by current and future sanctions from Western countries on Russian economy is difficult to quantify currently.</p> <p>The Russian legal, tax and regulatory frameworks continue to develop in a fast pace towards countries behind sanctions ("unfriendly countries") with frequent negative changes.</p> <p>Conclusion, on legal environment (in both Russia and internationally) is that it may potentially have a negative impact on Idavang's operations in Russia and the financial position in the future.</p>	<p>The Russian economy is particularly sensitive to oil and gas prices.</p> <p>Considering the sensitivity of the economy to oil and gas prices, the economic situation in the future is difficult to predict, as the country's ability both to produce and to sell its oil and gas is expected to be negatively impacted by both current and future sanctions from Western countries.</p> <p>Furthermore, Russia has allocated massive part of Russian budget towards military (e.g., special military operation in Ukraine), which negatively impact both now and in the future wealth in Russia. Hence, both purchase power and inflation levels (2022 11.8 % and 2021 8.4 %) are expected to be further negative impacted.</p> <p>Conclusion, on emerging market risk, is that it is increasing in the Russian economy, and impacting Russian both consumers' purchase power and inflation negative.</p>	<p>Pigs are fed by grain, protein (e.g. soya and sunflower) and premixes (vitamin and minerals), which account for a significant part of production costs.</p> <p>An increase in these prices, together with an inability to transfer such increased costs to slaughterhouses, may have a material adverse effect on Idavang's profit. Over time, such an imbalance will lead to inefficient producers and closed productions; hence supply will be reduced, which will increase prices again.</p> <p>Idavang mitigates this exposure by being a cost-efficient producer with high productivity and operations in markets with natural premiums.</p>
<p>The Board of Directors and Executive Board of Idavang are taking these issues into account in the ongoing strategic review of Idavang's Russia business. When evaluating the different strategic options for the future of Idavang's Russian business, including a potential sale of the business. (Company Announcement No. 19/2022)</p> <p>No conclusion of the process has been reached, at the date of signing the annual account.</p>			

Current Risks (II)

Concentration of production facilities in North Western Russia and Lithuania	Russian, EU and global economic conditions	Diseases	Financial risks
<p>The concentration of production facilities in North Western Russia and Lithuania means that Idavang's operations are dependent on the degree to which raw materials can be imported and the possibility of exporting from Lithuania to EU and especially Russia (if it opens up borders) ensures the best prices for Lithuanian live pigs.</p> <p>Two areas can disrupt this export possibility: the political situation and outbreaks of diseases.</p> <p>Currently, Russian borders are closed for all imports of live commercial pigs and for chilled and frozen meat from a number of countries due to veterinarian and/or political reasons (embargo).</p> <p>Polish borders are closed for all imports of live commercial pigs from ASF Zone 2+3 in Lithuania, whereas pork meat from ASF Zone 2 can be sold in Poland, chilled and frozen.</p>	<p>An economic downturn or an uncertain economic outlook in the Russian economy could adversely affect consumers' meat and pork consumption habits.</p> <p>Similarly, a global economic downturn or an uncertain economic outlook in the world economy could adversely affect global consumers' meat and pork consumption habits. With pork being a global commodity, the individual regions as EU or Russia will also be effect, but the effects might be lower as regional markets have own fluctuations.</p>	<p>An outbreak of a serious disease could potentially cause a loss of earnings from the relevant farm for a period during which a replacement herd would be put into operation.</p> <p>Production management places high focus on the risk, and the highest biosecurity measures are taken. Furthermore, the herd is insured for all diseases to mitigate the risk to the highest possible degree.</p>	<p>During 2022, the RUB has fluctuated within a range of 57% against the EUR.</p> <p>As a result, the total effect for 2022 was an 10% appreciation EUR/RUB, which positively affected equity by EUR 5.6m, as all Russian tangible assets are measured in RUB.</p>

Management's Review

Corporate Social Responsibility

Idavang's CSR policy covers the four areas of the UN Global Compact:

Human Rights

Labour Rights

Environment

Anti-corruption

The CSR policy also has special focus on climate change, occupational health and safety, animal welfare and community development.

The company focuses on the following five values:

Respect & Trust

Quality & Ethic

Transparency

Environmental Responsibility

Constant Development

The Idavang group is constantly working on safeguarding these values throughout our organization. Historically, the Idavang group has always focused on CSR, including animal welfare. Consequently, Idavang has had group-housed sows and used partly slatted floors since its establishment in 1999.

The company business model can be seen on page 12

In corruption cases, contracts with employees and suppliers are terminated without any limitation. Idavang has not identified any corruption cases in 2022, and does not expect to identify any corruption cases in 2023.

Intellectual Capital Resources

Idavang considers the employees and the organizational culture as the most important assets of the company. The Company's long term success is highly linked to attracting, retaining and developing the employees. which is why both internal and external training and education are priorities of Idavang.

Anti-corruption Policy

The aim of the company's anti-corruption policy is to define Idavang's business practice for countering

corruption and bribery and to provide guidance to employees. Idavang has a zero tolerance policy towards bribery and corruption.

All our partners and employees are informed about our attitude and principles towards corruption. Warning signs are placed on walls, doors and info boards around on the farms as well as in the country headquarters.

This policy extends to all Idavang's business dealings and transactions in all countries in which we operate. The policy is fully implemented in both Lithuania and Russia. Suppliers and business contacts are periodically being informed about requirements.

Risk identified

Small gifts and corruption from suppliers

Actions

Small gifts (especially around Christmas) are mainly consumed at work.

In corruption cases, contracts with employees and suppliers are terminated without any limitation. Idavang has not identified any corruption cases in 2022, and does not expect to identify any corruption cases in 2023.

Environmental Matters

Environmental matters are an integrated part of Idavang's mission and we make no compromises. We constantly strive to take care of the environment in all everyday actions, and we acknowledge the need to take care of natural resources to the benefit of future generations.

Our focus is to reduce any negative impact that our production may have on the environment. We do not have full ownership of the entire value chain. However, we urge all our business partners to help us take care of the environment. The manure is a valuable fertilizer which, however, has a specific odor. Putting the fertilizer to efficient use and causing no inconveniences to our neighbors, we carry out careful maintenance and continuous improvements of the manure collection, storage and fertilization systems.

Many of our complexes in Lithuania and Russia have successfully functioning manure management equipment that separates the liquid and solid fraction of manure and removes excess phosphorus and ammonia. Furthermore, there are closed Lagoons on every farm with top and double liners to prevent the emission of ammonia, nitrogen (greenhouse gas). Closed lagoons also ensure that no odour will be released into the air.

Key risk/targets identified

Reducing the amount of mineral fertilizer by supplying organic fertilizer (manure) to farmers on the optimal time.

Actions

Improve coordination with farmers so that the organic fertilizer has the highest effect hence replacing the maximum volume of mineral fertilizer, with organic fertilizer. In 2023 our work related to environmental matters will continue unchanged from 2022.

KPI is the price paid for organic fertilizer as we assume it equals mineral fertilizer volume reduced. Revenue in 2022 was EUR 1.443k (2021 - EUR 825k). Higher prices illustrate higher fertilizer value, partly due to increasing energy prices.

Animal Welfare

The ethical treatment of animals is one of our fundamental values. Our work is based on the criteria of fairness, transparency and European and national legislation on animal welfare. We carry out regular reviews and assessments of our activities to ensure top-level animal welfare and efficiency of production.

Animal welfare is universal difficult to measure, hence indirectly measuring is best indicators for animal welfare, and we (in Idavang) say "a happy pig is a well performing pig". Good animal welfare produce good production results as well, therefore Idavang benchmark towards EU averages on the two KPI's: daily live gain for slaughter pigs (DLG – higher is better) and Feed conversion rate (FCR – lower is better).

KPI Idavang measure as follows DLG 931g/day (vs. EU norm 829g/day) and FCR 2,83 kg feed/kg gain (vs. EU average 2,83)

Health and Safety Policy

The main purpose of the Occupational Health and Safety system is to protect employees' life and health and to ensure good working conditions by avoiding injuries and accidents. The Occupational health and Safety tasks are structured in seven main tasks:

1. Strengthen and develop health and safety systems by forming socially responsible approach to the employees' health and safety
2. Perform an occupational risk assessment of all workplaces
3. Improve the system of training certification and instruction of employees on issues of the employees safety and health
4. Increase preventive efficiency of the employees health care
5. Increase fire safety
6. Improve safety of employees performing dangerous work
7. Providing safe, healthy work conditions for every employee

Key risk/targets identified

Work accident

Actions

Activities within this area has top priority, therefore after every accident happens an e-mail is sent to all users, to ensure learning from the case.

Accident reports include all details, for example "During pig vaccination, the pig climbed on employee's left foot", followed by

pictures, employee account, etc. We will continue to improve and strengthen our health and safety systems in order to reduce the number of work accidents.

KPI is accidents 14 in 2022 (compared to 23 (2021) and expect fewer work accidents than 14 in 2023

Work accident are defined as "a person was injured and he or she had sick leave or missed one or more working days"

Human Rights

We care about human rights, hence we do not tolerate discrimination of any kind, be it about nationality, gender, age, sexual orientation or other. Neither do we tolerate violence physical nor psychological against employees or management.

Key risk/targets identified

Child labor and discrimination in our company / supply chain

Actions

Suppliers are periodically reviewed for fulfilling Idavang standards of, among others, anti-corruption, human rights (including child labor and discrimination), and animal welfare.

During reviews done in 2022, there were no identified violations of Idavang standards, and do not expect to identify violations of Idavang standards in 2023.

Community Relationships

We will continue our work on supporting the neighboring communities, paying special attention to educational initiatives, social issues and sustainable development of rural territories.

Climate

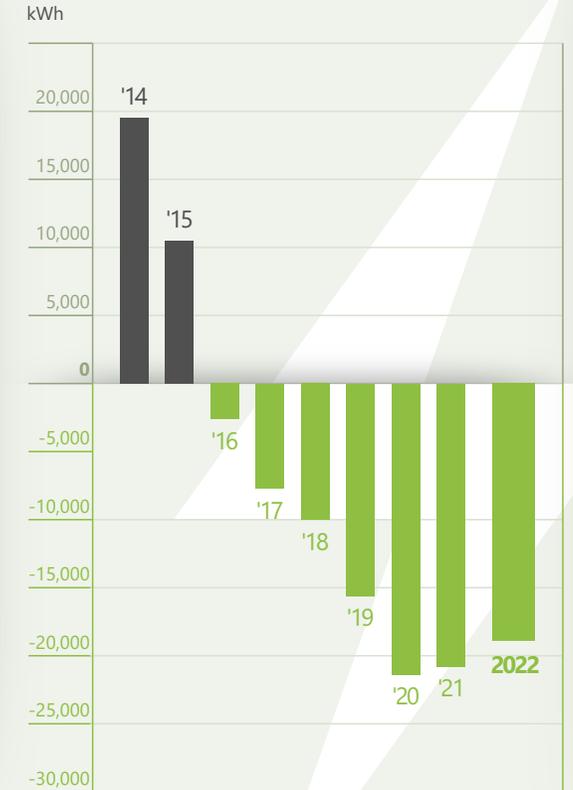

Focus in our business relates not only to our production facility, but also to our partner companies.

Focus is on reducing energy consumption, which is done in many areas implementing efficient straw boilers as source of heat, ensuring that our partners use new EURO4/EURO5 trucks that use AdBlue technology and utilizing gas in manure through biogas.

Biogas, where we use our efforts together with a business partner (Modus Energy) we have established biogas plants with the aim to improve environmental targets.

In 2016 we managed to become net supplier of energy, as you can see in the graph we have increased the net supply the latest years.

Net consumption

Corporate Governance

Shareholders

Shareholders can exercise their rights at the general meeting of shareholders, which is the company's supreme governing body.

Board of Directors

The overall task of Idavang's Board of Directors is to create value for the shareholders by managing the company.

The Board resolves matters relating to Idavang's strategic development, budgets, risk factors, acquisitions and divestments as well as major development and investment projects. Furthermore, the Board of Directors supervises the Executive Board.

Executive Board

The Executive Board of Idavang is appointed by the Board of Directors and is responsible for the company's day-to-day management, including the development and results of the company's operations as well as the company's internal development. The Executive Board is responsible for implementing Idavang's strategy and the overall resolutions approved by the Board of Directors.

For details on the Board of Directors or Executive Board see page 19.

Audit Committee

The Board of Directors has set up an Audit Committee to assist it in supervising the financial reporting process and the efficiency of Idavang's internal control and risk management systems.

The Executive Board is responsible for maintaining controls and an effective risk management system and it has taken the necessary steps to address the risks identified in relation to financial reporting.

The composition of the Board of Directors, Audit Committee and Executive Board ensures the availability of relevant competencies with respect to internal controls and risk management.

Financial reporting

In relation to its financial reporting process, Idavang has set up a number of internal controls to ensure that the company's financial reporting gives a true and fair view free from material misstatement. The internal control and risk management systems also ensure that the financial reporting complies with applicable laws and standards.

The financial reporting process is subject to systematic assessment on an ongoing basis in collaboration with the Audit Committee. The tasks and focus areas of the Audit Committee are updated every year in the form of an annual wheel. According to the annual wheel,

the tasks of the Audit Committee include monitoring the financial reporting process in connection with the publication of annual and interim reports, including a review of accounting policies and significant accounting estimates and judgments.

Internal controls and risk management systems in relation to the financial reporting

Corporate Finance conducts regular control inspections at Lithuanian and Russian subsidiaries to ensure that corporate standards for internal controls have been implemented and operate effectively.

Any proposals for improvement are reported to the audit committee. The audit committee chairman is the board member Jytte Rosenmaj.

The duties of the audit committee are to monitor the following:

- > The financial reporting process.
- > The company's internal control systems and risk management systems, including insurance matters.
- > The statutory audit of the financial statements.
- > The independence of the auditors, including in particular the provision of non-audit services to the Group.

Remuneration

Remuneration of members of the Board of Directors and the Executive Board

Idavang seeks to ensure that the remuneration of the Board of Directors and the Executive Board is at a competitive and reasonable level compared with companies of the same size and with the same complexity as that of Idavang to ensure that Idavang is able to attract and retain competent executives.

The members of the company's Board of Directors receive a fixed fee, the amount of which is subject to shareholder approval.

The remuneration and employment terms of the members of the Executive Board are determined by the Board of Directors, which also evaluates the work of the Executive Board.

The members of the Executive Board receive a fixed annual salary, and either have a performance-related cash bonus or a share-based long-term incentive program.

The remuneration paid for 2022 is specified in note 5 in the Group Notes.

Remuneration General

Idavang has a competitive remuneration system for all employees.

Idavang pays competitive salaries to our employees. The salary structure has standardized principles and is transparent to all employees.

Furthermore do we provide free meals, working clothes and footwear for our employees.

Intellectual Capital Resources

Idavang considers the employees and the organizational culture as the most important assets of the company.

The Company's long-term success is highly linked to attracting, retaining and developing the employees, which is why both internal and external training and education are priorities of Idavang.

Human Resource Policy

The company's goal is to ensure that both genders are always represented on the Board of Directors, which they currently are.

The company is committed to observing the group's human resource policy, which first key principles are the equality of employees.

The Board of Directors has one female board member out of five, equal to 20% (1 of 5), and non in the management are female (by the end of 2022). The gender representation is unchanged compared to the end of 2021 (1 female of 9).

Idavang Group's objective regarding diversity at the Board of Directors level is that at least one of the boardmembers / management team should be of the under-represented gender.

Idavang has fulfilled the ambition in 2022 and also expects to do so in future years.

The company wishes to honor diversity and equal gender representation in management. When selecting new board members or new management members, the company strives to

represent both genders among the last three candidates.

We want the company's employees to experience equal opportunities for employment, improvement, career-making, and gaining management positions regardless of gender, age or nationality.

Data Ethics Policy

The company has no policy as external data is extremely limited, but follows all applicable laws.

Post Balance Sheet Events

No events materially affecting the Group and the Company's financial position have occurred subsequent to the financial year-end.

Note 1. Significant Accounting Policies

Basis of preparation

The consolidated financial statements are prepared in accordance with International Financial Reporting Standards ('IFRS') as adopted by the EU and additional Danish disclosure requirements for financial statements prepared by large reporting class D enterprises.

The consolidated financial statements are presented in EUR, as the majority of the group is EUR related. The parent's functional currency is DKK.

The financial statements have been prepared on the historical cost basis except for biological assets and hedging contracts, which are measured at fair value, and amortized cost for loans were relevant.

The accounting policies remain unchanged from previous year.

Consolidated financial statements

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity where the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

The consolidated financial statements are prepared by aggregating the parent's and the subsidiaries' financial statements, prepared in accordance with the accounting policies applied by the group. Intra-group income and expenses, shareholdings, etc., intra-group balances and dividends and realized and unrealized gains on transactions between the consolidated entities are eliminated on consolidation.

Currency translation

Transactions denominated in foreign currencies are translated into EUR at the exchange rates at the date of the transaction. Monetary items denominated in foreign currencies are translated into EUR at the exchange rates at the balance sheet date. Realized and unrealized exchange gains and losses are recognized in profit or loss as financial income/expenses.

Non-monetary assets and liabilities measured at historic cost in foreign currencies are translated into

EUR at the exchange rates at the date of recognition. Non-monetary assets and liabilities measured at fair value in foreign currencies are translated into EUR at the exchange rates at the date of determination of the fair value.

Exchange rate	2022 average	2021 average	31.12.2022	31.12.2021
EUR/RUB	68.70	87.71	75.66	84.07
EUR/DKK	7.4365	7.4365	7.4365	7.4365

Derivative financial instruments

The Group enters into matif contracts with respect to grain in order to secure future supply.

Derivate financial instruments are initially measured at fair value at the time of conclusion of the contract and subsequently at fair value at the balance sheet date. They are recognised in other receivables when the fair value is positive and in other payables when the fair value is negative. Changes in the fair values of derivate financial instruments that are designated and qualify as hedges of future commodity purchases are recognised in other comprehensive income. Income and expenses relating to such hedging transactions are transferred from other comprehensive income on realisation of the hedged item and are recognised in the same entry as the hedged item.

Any gains or losses arising from changes in the fair value of derivative financial instruments that not qualify as hedges are recognised under net financials in the income statement.

Purchase contracts

The company enters into purchase contracts on feed components, for future delivery, for use in pig production (executory contracts). The cost price for the grain is the agreed contract price which is recognised in the books at time of delivery.

An onerous executory contract is a contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. An executory contract for purchase of inventory is deemed onerous if the economic benefit expected to be received from the products produced with it (net realisable value of the inventories to be obtained) is lower than the costs. For onerous contract a provision is recognised.

Income statement

Revenue

Revenue from sale of slaughter pigs and weaners are recognised in the income statement when the delivery and transfer of risk to the buyer has been made before year end. Revenue is recognised exclusive of VAT and is measured at the fair value of the consideration received or receivable.

Production costs

Production costs comprise expenses incurred in generating the revenue for the year.

Such costs include direct and indirect production costs relating to raw materials and consumables, wages and salaries, rent and leases, and depreciation, amortisation and impairment losses in respect of production plant.

Dividend

Dividend revenue is recognised when the Group's right to receive the dividend has been established.

Net financials

Financial income and expenses are recognised in profit or loss at the amounts that relate to the reporting period. Net financials include interest income and expenses, realised and unrealised capital and exchange gains and losses on securities and foreign currency transactions and surcharges and allowances under the advance-payment-of-tax scheme, etc.

Government grants

The Group's government grants are subject to IAS 20 and comprise:

Government grants related to expenses

In Russia, the Group historical received government grants in the form of reimbursement of interest expenses on loans, when constructing farms. These grants are recognised together with depreciations of the assets.

Government grants related to expenses are recognised as income as the right to the grant is earned and received, i.e. as the eligible expenses are incurred and the grant is deposited in a bank account.

Government grants related to property, plant and equipment

In Lithuania, the Group receives government grants for the investment of property, plant and equipment in return for the Group's commitment to carry on pig production for a certain number of years.

Government grants for assets are recognised as deferred income, which is reduced in step with the depreciation of the related asset and recognised in profit or loss under depreciation.

Income taxes

Income taxes include current tax on the year's expected taxable income and the year's deferred tax adjustments less the share of the tax for the year that concerns changes in equity.

Current and deferred taxes related to items recognised directly in equity are taken directly to equity.

Balance sheet

Intangible assets

Intangible assets with indefinite lives comprise goodwill. Goodwill is not amortised but is tested for impairment on an annual basis. The impairment test is performed for the cash-generating unit to which the goodwill belongs. The carrying amount of goodwill is reduced to the higher of the value in use and the fair value less costs to sell of the activity or the business area to which the assets relate (recoverable amount) if it is lower than the carrying amount.

Intangible assets with definite lives

Intangible assets with definite lives comprise electricity rights and the right to buy leased land in Russia. The rights are measured at cost less accumulated amortisation and impairment. Rights are depreciated using the straight-line method on the basis of the cost over the following useful lives:

Intangible assets	Useful life, years
Rights	20-25

The rights are tested for impairment whenever there is an indication that they might be impaired. The impairment test is performed for each individual asset or group of assets, respectively. The carrying amount of the assets is reduced to the higher of the value in use and the fair value less costs to sell of the asset or group of assets (recoverable amount) if it is lower than the carrying amount.

Property, plant and equipment

Property, plant and equipment include land and buildings, plant and machinery and other fixtures and fittings, tools and equipment. Property, plant and equipment are measured at cost less accumulated depreciation and impairment. The cost includes the cost of acquisition, expenses directly attributable to the acquisition of the asset and expenses incurred to prepare the asset until such time as it is ready to be put into operation.

Depreciation is calculated on the basis of cost price reduced by the residual value and any impairment

losses. The residual value is determined at the date of acquisition and is reviewed on an annual basis. If the residual value exceeds the carrying amount of the asset, depreciation is discontinued. Where the depreciation period or the residual value changes, the effect on depreciation is recognized prospectively as a change in accounting estimates.

Property, plant and equipment are depreciated using the straight-line method on the basis of the cost over the following useful lives:

Fixed assets	Useful life, years
Buildings	25-40
Plant and machinery	8-15
Other fixtures and fittings, tools and equipment	3-10

Land is not depreciated. Gains and losses from the sale of property, plant and equipment are calculated as the difference between the selling price less selling costs and the carrying amount at the time of sale. Gains or losses are recognised in profit or loss.

Property, plant and equipment are tested for impairment whenever there is an indication that an asset might be impaired. The impairment test is performed for each individual asset or group of assets, respectively.

The carrying amount of the assets is reduced to the higher of the value in use and the fair value less costs to sell of the asset or group of assets (recoverable amount) if it is lower than the carrying amount.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset, which is an asset which requires a substantial period of time to get ready for its intended use or sale, are capitalised as part of the cost of the asset concerned until such time as it is essentially ready for its intended use or sale. Borrowing costs comprise interest and other expenses incurred in connection with borrowing.

NOTES: Group

Financial Statements for the period January 1 - December 31

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low value assets. The Group recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Leasing assets	Useful life, years
Buildings - office	5
Buildings - production	10
Other (contract length)	3-70

The Group recalculate lease liabilities and the right to use asset, when modifications of leases are made.

Right-of-use-assets. The Group recognizes right-of-use assets at the commencement date of the lease. Initially right-of-use assets are measured at the present value of the future lease payment plus the cost of obligations to refurbish the assets. Payments mainly consist of fixed payment and is adjusted for any remeasurement of lease liabilities. The leased assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. Right-of-use assets are tested for impairment whenever there is an indication that the asset may be impaired.

Lease liabilities. At the commencement date of the lease, the Group recognize lease liabilities measured at the present value of lease payment to be made over the lease term. The lease payments include fixed payments. In calculating the present value of the lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable.

After the commencement date, the amount of lease liabilities is reduced for the lease payments made and the carrying amount of the lease liability is re-measured if there is a modification, a change in the lease payments or a change in the assessment of an option to either extend or terminate the contract. The Group's lease liabilities are included in interest bearing debt (see note 25).

Short-term leases and leases of low value assets. The Group applies the recognition exemption to its short-term (lease term of less than 12 months that do not contain a purchase option) and low value asset leases. Lease payments on these contracts are recognized as expenses.

Biological assets

Breeding herds are classified as non-current. Commercial herd (slaughter pigs) are classified as current.

Biological assets are recognized when the Group controls the asset and it is probable that future economic benefits associated with the asset will flow to the Group and the cost or fair value of the asset can be measured reliably. Biological assets are measured at fair value less selling costs.

Value adjustments of biological assets are recognized in profit or loss for the period to which they relate. The value of crops is calculated at cost plus production overheads. At the time of harvest, crops are reclassified from biological assets to inventories, measured at fair value less the cost of transportation, which subsequently makes up the cost.

Inventories

Inventories are measured at cost by reference to the FIFO method. Where the net realizable value is less than the cost, the carrying amount is reduced to such lower value.

Receivables

Receivables are recognized initially at fair value and subsequently measured at amortized cost less impairment assessment is based on the Expected Credit Loss model (ECL). The ECL model involves a three-stage approach under which financial assets move through the stages as their credit quality changes.

The stages determine how impairment losses are measured and the effective interest is applied. For trade receivables, the Group applies the simplified approach, which permits the use of lifetime ECL. Provisions rates are determined based on groupings of trade receivables sharing the same credit risk characteristics and days past due.

Prepayments

Prepayments comprise prepaid expenses.

Equity

Foreign currency translation adjustments

Foreign currency translation adjustments comprise exchange adjustments in connection with the translation of foreign subsidiaries' balance sheets from their functional currency into the Group's presentation currency.

Other reserves

Other reserves comprise hedge accounting in Lithuania.

Income taxes

Current taxes are recognized in the balance sheet as the estimated tax in respect of the expected taxable income for the year, adjusted for tax on prior years' taxable income and tax paid in advance.

Provisions for deferred tax are calculated at local rates of all temporary differences between carrying amounts and tax values, with the exception of temporary differences occurring at the time of acquisition of assets and liabilities neither affecting the results of operations nor the taxable income, and temporary differences on goodwill.

Deferred tax assets are recognized at the value at which they are expected to be utilized, either through elimination against tax on future earnings or a set-off against deferred tax liabilities.

Financial liabilities

Financial liabilities comprise mortgage debt, payables to other credit institutions and subordinated loans. Financial liabilities are recognized at the inception of the loan at the proceeds received, net of transaction costs incurred. Financial liabilities are subsequently measured at amortized cost, determined by reference to the effective interest rate at the time of borrowing.

Fair value

Fair value measurements are based on the principal market. If no principal market exist, the measurement is based on the most advantageous market, i.e. the market that maximizes the price of the asset or liability less transaction and/or transport costs. All assets and liabilities which are measured at fair value, or whose fair value is disclosed, are classified based on the fair value hierarchy, see below:

Level 1:

Value in an active market for similar assets/liabilities

Level 2:

Value based on recognized valuation methods on the basis of observable market information

Level 3:

Value based on recognized valuation methods and reasonable estimates (non-observable market information).

Cash flow statement

The cash flow statement shows the Group's and the parent company's net cash flow during the year, the year's changes in cash and cash equivalents and the cash and cash equivalents at the beginning and at the end of the year.

Cash flows from operating activities are presented using the indirect method and are calculated as the profit or loss for the year, adjusted for non-cash operating items, changes in working capital, paid financial expenses and paid income taxes.

Cash flows from investing activities comprise payments related to additions and disposals of fixed assets, securities related to investing activities and dividends received from subsidiaries. Cash flows from financing activities comprise dividends paid to shareholders, borrowings and repayments of interest-bearing debt.

Cash and cash equivalents comprise cash.

Financial highlights

Financial ratios are calculated in accordance with the recommendations of the Danish Finance Society.

Segment information

Revenue, result, total assets and liabilities has been allocated according to geographical markets.

Board approval

The annual account has been reviewed and approved by the board on the 28th February 2023, and will be presented to the shareholders on the Annual General Meeting later on the 28th February 2023.

NOTES: Group

Financial Statements for the period January 1 - December 31

Ratios

Term	Description
EBITDA	Earnings before interest, tax, depreciation and amortization
EBITDA margin	$\text{EBITDA} \times 100 / \text{Revenue}$
Current ratio	$\text{Current assets} \times 100 / \text{Current liabilities}$
Equity ratio	$\text{Total equity} \times 100 / \text{Total assets}$
Return on equity	$\text{Profit for the year} \times 100 / \text{Equity}$
Sold volume live weight	Weight of slaughter pigs, piglets, weaners and sows sold
kMT	1,000,000 kg
Average invested capital	Assets less cash, less bonds less non-interest-bearing debt including provisions
Return on average invested capital	$\text{EBIT (Operating profit)} \times 100 / \text{Average invested capital (average for the year)}$
Net interest-bearing debt	Non-current interest-bearing liabilities plus debt to credit institutions less cashless bonds
EBITDA fixed herd prices	EBITDA adjusted for the unrealized value adjustment related to biological assets.

2

Note 2. Critical Accounting Estimates And Judgements

In preparing the Group's Consolidated Financial Statements, Management makes various accounting estimates, judgments and assumptions, which form the basis of presentation, recognition and measurement of the Group's assets and liabilities.

Material accounting estimates and judgments relate primarily to the Group's biological assets in the fields, which in a large part of the year are covered by snow and commercial pigs below 60 kg. in Russia.

When assessing the fair value of crops, the Group estimates that there was no material biological transformation from the time of sowing until the field work starts 1 July, and therefore these biological assets are measured at cost, which corresponds to the fair value.

Assessing the fair value of commercial herd below 60 kg it is based on multiplied a discretionary factor (calculated as the Russian sales price for slaughter pigs in EUR last month / Lithuanian sales price for slaughter pigs last month) on the values per category calculated for the Lithuanian market.

Estimation Uncertainty

Determining the carrying amount of some assets and liabilities requires judgments, estimates and assumptions concerning future events.

The judgments, estimates and assumptions made are based on historical experience and other factors, which Management assesses to be reliable, but which by their very nature are associated with uncertainty and unpredictability. These assumptions may prove incomplete or incorrect, and unexpected events or circumstances may arise.

The Group is also subject to risks and uncertainties, which may lead to actual results differing from these estimates, both positively and negatively. Assumptions about the future and estimation uncertainty on the balance sheet date is described in the notes where there is a significant risk of changes that could result in material adjustments to the carrying amount of assets or liabilities within the next financial year.

Management regards biological assets to include the key accounting estimates and assumptions used in the preparation of the Consolidated Financial Statements.

The Group's biological assets are measured at fair value less estimated costs to sell at each balance sheet date.

Breeding herd, fair value prices for the herd are estimated in the following way:

Gilts.

The fair value price of gilts is estimated using the following principle. 22-week (PRRS negative) gilt quotes are obtained from a reputable Danish genetic company. The quote is in DKK. So it is converted to EUR using the exchange rate at the end of the reporting period (e.g., Dec22A).

The current quote in EUR is the adjusted with the following two adjustments: (i) the current quote is reduced by the current year's market sale price for the 93 kg slaughter pigs (that is the assumed weight of a 22 week pig), and (ii) reduced price is then increased by the 2.5-year weighted average price of a 93 kg (or 22 week) pig. The weighted 2.5-year average price is estimated assigning 40% weights to the current and previous year prices and 20% to the price two years back.

After applying the two adjustments, the long-term gilt value. The long-term gilt value is used to derive average gilt price. Specifically, the long-term gilt value is first increased by adjusting for growing 5 additional weeks (total of 27 weeks). This adjustment is based on the quoted premium for gilts above the age of 22 weeks as per a reputable Danish genetic company.

Secondly, the long-term gilt value is reduced by estimate of genetics. This adjustment is estimated as 1/2 of the difference between 22-week (PRRS negative) gilts and current year slaughter pig price. As per Management, the estimate of price reduction is conservative. Hence, the Management treats this conservative adjustment sufficient to also cover the transport expenses. After all these adjustments, the Management derives the average price for 27-week (PRRS negative) gilt.

Sows.

The fair value price for sows is based on the average gilt price. To arrive at the fair value estimate of base sow, the value is adjusted for growing the gilt by additional 5 weeks (total of 32 weeks). This adjustment is based on the quoted premium for gilts between 26 and 32 weeks as per a reputable Danish genetic company.

Next, the estimated value of piglets per sows per year. The fair value estimate of piglets per sow is made using actual current year piglets weaned per litter per sow multiplied by the 2.5-year average price of piglets and divided with 2 (assuming all sows are half way in pregnancy).

The 2.5-year average price of piglets is determined using monthly quotes obtained from the SPF-Danmark after converting from DKK to EUR. Fair value per sow is determined by adding fair value of piglets per sow to the fair value of gilt at 32-weeks of age.

Commercial herd, fair value prices for the commercial herd are determined in the following way:

Piglets.

Fair value price per piglet is determined based on the SPF-Danmark quotes for SPF-PRRS negative piglets at 7 kg for region 2 or 3. The quoted price is adjusted for the difference in the average weight of the commercial stock of piglets. (see all info quotes on spf.dk)

The adjustment is based on the SPF-Danmark quotes for piglet that are less than 7 kg. The Management makes the assumption that an average piglet on commercial stock is approx. 3.75 kg. The fair value price per piglet of 7 kg is adjusted for the quote differential between a 7 kg and a 3.75 kg piglet as per SPF-Danmark. This adjusted fair value price per piglet is used to value the commercial stock of piglets.

Weaners.

Fair value price per weaner is determined by the sum of a SPF-Danmark quote for SPF-PRRS negative weaners at 30 kg for region 2 or 3. Similarly as with piglets, the fair value price for weaners is adjusted for the difference in the average weight of the commercial stock of weaners. The adjustment is also based on the SPF-Danmark quotes for weaner that are less than 30 kg. The Management makes the assumption that an average weaner on commercial stock is approx. 18.5 kg. The fair value quote per weaner of 30 kg is adjusted for the quote difference between a 30 kg and an 18.5 kg weaner as per SPF-Danmark. The adjusted fair value price per weaner is used to value the commercial stock of weaners.

Slaughter pigs

For slaughter pigs between 30 kg and 60 kg, the fair value price per unit is determined by adjusting the 30 kg weaner price by the SPF-Danmark quotes for weaner that are above 30 kg. The Management makes the assumption that approx. 40% of all the slaughter pigs on commercial stock are between 30 kg and 60 kg, with the average weight of 45 kg. Hence, the fair value quote per weaner of 30 kg is adjusted for the quote differential between 45 kg and 30 kg, as per SPF-Danmark. The adjusted fair value price is used to value the commercial stock of slaughter pigs that are between 30 and 60 kg.

For slaughter pigs above 60 kg, the actual market sale price of slaughter pigs. Furthermore, the model assumes that a good approximate for average weight of slaughter pigs above 60 kg is the average between 60 kg and the actual average weight of slaughter pig sales (for FY22A this was 112.89 kg). In FY22A, the assumed that the average weight of slaughter pigs above 60 kg was approx. 86.44 kg.

Fair value assessment of commercial stock in Lithuania and Russia are conceptually identical. The key differences are that adjusted fair value prices for piglets, weaners and slaughter pigs between 30 kg and 60 kg are multiplied by a country risk factor (differences in sales prices in December between Russia and Lithuania on slaughter pigs). In FY22A this factor for Russia was set at 0.82 (and FY21 1.30). Actual Russian market price is used as a fair market value price for slaughter pigs above 60 kg.

The carrying amount at 31 December 2022 is EUR 40,099 thousand (2021 EUR 26,982 thousand). Please refer to note 15.

The Group's financial departments are responsible for performing the valuation of fair value measurements including level 2 fair values of biological assets.

Same valuation model and techniques are used every month. The valuation model includes market inputs from official prices and actual own sales prices in local markets. The valuation process and results for recurring measurement are reviewed and approved by Group Management at least once every quarter.

For crops sown in autumn, the Group generally estimate that there was no material biological transformation at 1 January till 30 June compared with the time of sowing, and therefore, these biological assets are measured at cost occurred in the process, which corresponds to the fair value.

If assumptions for biological transformation have changed, additional adjustments to the fair value are made at the end of each reporting period till the end of harvesting.

EUR	2022	2021
Slaughterpig sales price liveweight (per kg) – Russia end year	1.30	1.25
Slaughterpig sales price liveweight (per kg) – Lithuania end year	1.58	0.96
Weaners (30 kg) sales price – Lithuania end year	65	27
Piglets (7 kg)	30	12
Premium/discount for Russian meat (relation between slaughter pig prices)	-18%	30%
Sows unit price – Russia	552	559
Sows unit price – Lithuania	429	472

Tangible assets depreciations periods are based on decline in value of assets. Idavang business model means that assets typically continue to use assets which has very limited market value. The old tangibles assets are maintained extensively with higher than normal maintenance cost as consequence. The fully depreciated assets still in use of EUR 35,916 thousand, is estimated to have sales value approximate equal to scrap metal.

NOTES: Group

Financial Statements for the period January 1 - December 31

Russian Activities

As of the date of signing this annual report, Russian military forces "special military operation" into Ukraine has limited direct on Group operations in Russia. The Idavang groups operation in Russia of cropping 8.2 thousand hectares and production of 340 thousand pigs has significant distance to areas impacted by the "special military operation".

Until now, overall the Russian "special military operation" into Ukraine has not impacted the Group's activities in Russia and Management assesses that the Group continues to be able to control and operate the Russian activities. Therefore, the Russian activities, assets and liabilities are consolidated in the Consolidated Financial Statements. Ordinary impairment tests have been performed and it has been concluded that no impairment write downs are needed on the Russian Activities.

Based on the risks mentioned in "Risk Section" and the present business environment in Russia, there are uncertainties related to assessing the future control of - and potential writedowns of - the Russian activities.

Definition of other is Idavang A/S, Rurik A/S, Rus Invest Aps and elimination (of intercompany debt, cash pool and interest). Eliminations made are 3.290 kEUR between Financial income/expense and 17.660 kEUR between Total assets and Liabilities.

Russian revenue

Russian operation is full line; hence revenue mainly consists of live slaughter pigs sold to slaughterhouses. Volume produced is relative linear between months.

All sales are made in Western part of Russia and mainly around Skt. Petersburg.

EBITDA (at fixed herd prices) comes from pig operation and field operation.

Field output is traditional used as feed; calculation of EBITDA is based on prices on output in harvest.

Russian EBITDA

Lithuanian revenue

Lithuanian operation is full line; hence revenue mainly consists of live slaughter pigs sold to slaughterhouses. Volume produced is relative linear between months.

Minor part of revenue is slaughter pigs combined with killing services (included on the graph as slaughter pigs)

Sales are mainly made in Lithuania, but sales also made done to neighboring countries e.g., Poland and Latvia.

All EBITDA (at fixed herd prices) comes from pig operation.

Lithuanian EBITDA

Idavang Group did in 2022 have 3 customers above 10%, with 15%, 11% and 10%.

Definition of other is Idavang A/S, Rurik A/S, Rus Invest Aps and elimination (of intercompany debt, cash pool and interest). Eliminations made are 637 kEUR between Financial income/expense and 37.774 kEUR between Total assets and Liabilities

Russian revenue

Russian operation is full line; hence revenue mainly consists of live slaughter pigs sold to slaughterhouses. Volume produced is relative linear between months.

All sales are made in Western part of Russia and mainly around Skt. Petersburg.

EBITDA (at fixed herd prices) comes from pig operation and field operation.

Field output is traditional used as feed; calculation of EBITDA is based on prices on output in harvest.

Russian EBITDA

Lithuanian revenue

Lithuanian operation is full line; hence revenue mainly consists of live slaughter pigs sold to slaughterhouses. Volume produced is relative linear between months.

Minor part of revenue is slaughter pigs combined with killing services (included on the graph as slaughter pigs)

Sales are mainly made in Lithuania, but sales also made done to neighboring countries e.g., Poland and Latvia.

All EBITDA (at fixed herd prices) comes from pig operation.

Lithuanian EBITDA

Idavang Group did in 2021 have 2 customers above 10% with 13% and 11%

Note 13.

Impairment Test, Intangible Assets

Intangible assets with indefinite lives (goodwill) are tested for impairment on an annual basis.

Goodwill

Goodwill relates to Lithuania: Šalnaičių (1999) and Skabeikių (2006).

Goodwill is tested for the smallest group of cash-generating units in respect of which goodwill is monitored by Management and which is not larger than the group's operating segments.

As sales and production are managed centrally in each individual country, goodwill is monitored at country level. Goodwill has been allocated to Lithuania, the carrying amount of goodwill at 31 December totaled:

Lithuania	2022	2021
EUR'000	1,019	1,019

The recoverable amount is determined on the basis of a calculation of the value in use using cash flow calculations based on budgets and forecasts for 2022-2024 (2020: 2021-2023), as approved by management. The calculation of the value in use is based on the following estimates:

Lithuania	2022	2021
Discount factor before tax	9.7%	8.5%
Growth rate in terminal period	2%	2%

The key assumptions used in cash flow projections are as follows:

Selling price per kilo pork compared with cost price per kilo grain

For Lithuania, an expectation as to average sales prices and grain prices has been used, based on 2022 budget. Forward estimates are based on historical averages and EU forecasts.

Investments

Lithuania's investments are expected to be EUR 1.1m in 2023, but in from 2024 and in terminal value investment is included equal to depreciations to be conservative. It is therefore Management's judgement that investments will be lower than depreciation charges going forward.

Working capital

In Management's opinion, working capital reached a normal level in 2022 in the cash generating units. Management does not expect significant changes to the level of working capital in future.

As the estimated value in use is considerably higher than the carrying amount, the impairment test shows no indication of impairment of goodwill.

Safety margin in performed impairment test

Management estimate the safety margin in 2022 impairment test to be 32% (compared to safety margin of 15% in 2021).

NOTES: Group

Financial Statements for the period January 1 - December 31

Idavang uses the following hierarchy for determining and disclosing the fair value:

Level 1:

Quoted (unadjusted) prices in active markets for identical assets

Level 2:

Significant observable inputs

Level 3:

Significant unobservable inputs

Commercial and breeding herd are measured at fair value level 2 due to significant links to observable quotes on pigs and recent sales prices.

	2022	2021
Crops	An area of 8,269 ha was harvested mainly wheat, and by the end of 2022 6,060 ha were seeded	An area of 8,117 ha was harvested mainly wheat, and by the end of 2021 7,385 ha were seeded
Commercial herd	Stock decreased and at year-end stock was 363,728 pigs. During the year 703,924 slaughter pigs, 0 weaners and 11,269 sows were sold	Stock decreased and at year-end stock was 330,293 pigs. During the year 782,904 slaughter pigs, 0 weaners and 13,994 sows were sold
Breeding herd	Stock decreased and the year ended with a total of 30,415 sows, gilts and boars	Stock decreased and the year ended with a total of 25,981 sows, gilts and boars

Crops are based on cost of seed, fertilizer, chemical, variable cost and salary to field production. Revaluation of consumable biological assets was made based on the prices of the most recent sales prices and official quotes.

Commercial and breeding herd are measured at fair value level 2, due to significant links to observable quotes on pigs and recent sales prices See calculation method in note 2 Accounting estimates

Total financial liabilities measured at amortised cost	90,714	78,720	103,149	103,149

Fair value on outstanding bonds end year is difficult to evaluate due to high spread, sellers wanted @ 90.00 and buyers offered @ 67.50. It is included with 80 above, which is assumed to be fair market value.

Idavang uses the following hierarchy for determining and disclosing the fair value:

Level 1:

Quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2:

Other techniques for which all input that have a significant effect on the recorded fair value are observable, either directly or indirectly. All financial assets and liabilities are classified as level 2 except bonds and matif contracts (hedging), which are level 1. Nevertheless in 2022 bonds are classified as level 2 due to high spread.

Note 18.

Inventories

EUR'000	2022	2021
Raw materials and consumables	17,395	15,007
Cost of sales recognised in profit or loss (feed)	74,077	64,350

19

Note 19.

Trade Receivables

Trade receivables at 31 December 2022 include receivables at a nominal value of EUR 3,471 thousand (2021: EUR 4,403 thousand), the carrying amount of which has been reduced by EUR 0 thousand (2021: EUR 0 thousand) regarding write downs. Trade receivables overdue by more than 30 days are EUR 172 thousand (2021: EUR 98 thousand).

The reason why trade receivables are low compared to revenue is that all sales in Russia are prepaid by the customer and sales in the EU (mainly Lithuania) have been covered through credit insurance agreements since 2006.

As all sales in Russia are prepaid and all other sales have been covered by credit insurance the write-down according to the expected credit loss model is insignificant. Therefore there have not been recognized any write-downs on the receivables.

Contracting grain in Lithuania

Typical contacts buying grain in LT is split into two parts: Matif price and discount (for feed wheat).

The price is fixed using matif contracts, before physical contract is closed, hence gain/loss on matif contract and physical contract combined equals grain expense. Contracts are reviewed and unefficient parts of hedging transaction are classified as financial income/expense (e.g. 142 kEUR unefficient in 2022). The efficiency in 2022 was 98% and 98% in 2021, the efficiency percentages are calculated by comparing contracts with matif transactions.

In 2023 has hedging had effect on comprehensive income of 4.856 kEUR (4.274 kEUR in 2022).

Tax of other comprehensive income amount to 0kEUR, as tax on hedging is included when the gain/loss is transferred to the profit and loss.

22

Note 22.

Capital Structure

Capital management

The Group aims to create the room required to secure its strategic development activities and be able to provide a competitive return for its shareholders. The Board of Directors generally intends to distribute excess cash to the shareholders by way of dividends. However, dividends will always take into account the Group's growth plans and funding requirements.

Share and authorisations

Idavang A/S has only one share class with equal rights. Shares have a denomination of EUR 1 per share (hence total 800.000 shares). The shares are non-negotiable instruments.

Capital Structure

The share capital has been paid in full and 100% owned by JAST Holding Aps. All resolutions at the general meetings of shareholders must be adopted by a simple majority of the votes of the shares present at the meeting, unless one of the listed voting right restrictions or the Danish Companies Act provides otherwise. In the event of a tie, the proposal will lapse.

23

Note 23.

Financial Risks

Sales price risk

Idavang policy is selling on weekly auctions, but a minor percentage of sales to Lithuanian customers is linked to national price index.

The Group is highly exposed to global and EU developments in the price of pork. Lithuanian sales are fully linked to EU and German prices. A 1% change would affect profit by EUR 0.7m (2021: EUR 0.5m), all other things being equal. Russian sales due to closed borders towards the EU more linked to the global market. A 1% change would affect profit by EUR 0.4m (2021: EUR 0.5m), all other things being equal.

Raw material price risk

Board and management does quarterly on board meetings reconcile mandates for hedging.

The Group is highly exposed to global and EU developments in the price of grain and protein (soy and sunflower). A change of 10% on grain prices is estimated to affect profit by +/- EUR 4.2m in 2022 (based on current years purchase * 10%) (2021: EUR 4.6m), all other things being equal. Furthermore, a similar 10% change in protein prices is estimated to affect profit by +/- EUR 1.1m in 2022 (based on current years purchase * 10%) (2021: EUR 1.1m), all other things being equal.

Credit risk

The Group policy is to minimise its credit risks. Sales transactions should therefore for all Russian customers be carried through up-front in cash, and for EU clients, credit insurance need to be taken out in advance.

Liquidity risk

The Idavang Group has its main financing in a 5 year bond with bullet payment on expiry in December 2025, hence limited debt service. The Group monitors its risk to a shortage of funds, high-level liquidity planning tool and detailed budgets. The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, cash and bonds.

The Group have targets for reduction of net interest bearing debt during the next 4 years, so that refinancing the bond will be unproblematic. The Bond loan agreements is not subject to financial covenants.

The Group overdraft facility of 9 mEUR function mainly function as liquidity reserve.

Foreign exchange risk

Idavang policy is not to hedge EURRUB exposure.

Interest rate risk

Idavang policy is to have long funding of loans, and all changes in funding need board approval.

The Group's funding from bonds has variable interest rates and the remaining have fixed rates. It is the Group's policy not to enter into interest rate swaps. A 1% change in Euribor 3 months would, all other things being equal, affect P/L by EUR 0.6m (2021: EUR 0.8m).

NOTES: Group

Financial Statements for the period January 1 - December 31

EUR'000	2022	RUB	USD	EUR	12/31
Revenue		42,256	0	72,963	115,219
Production cost		-38,195	0	-66,526	-104,721
Administration expenses		-1,446	0	-2,124	-3,570
Net exposure		2,615	0	4,313	6,928
Payables to credit institutions		12,746	0	63,706	76,452
Net exposure		12,746	0	63,706	76,452

The following assumptions are made in the overview above: revenue in Russia is RUB-denominated. Grain and soy in Russia are from 1st January 2022 assumed RUB exposure as invoiced in RUB. EUR includes DKK as it's tied to the EUR.

EUR'000	2021	RUB	USD	EUR	12/31
Revenue		46,298	0	53,864	100,163
Production cost		-17,700	-18,156	-56,338	-92,195
Administration expenses		-1,287	0	-2,434	-3,721
Net exposure		27,311	-18,156	-4,908	4,247
Payables to credit institutions		18,154	0	73,847	92,001
Net exposure		18,154	0	73,847	92,001

The following assumptions are made in the overview above: revenue in Russia is RUB-denominated. Grain and soy in Russia are linked to USD also when formally invoiced in RUB. EUR includes DKK as it is tied up to the EUR.

The Group's policy is to minimize current payables to credit institutions. The Group has assessed the concentration of risk with respect to refinancing of its debt, finding it to be low and spread among a number of banks.

Access to sources of funding is sufficiently available and debt maturing within 12 months is expected to a high degree to be rolled over with existing lenders.

EUR'000	2022	1/1	Cash flow	FX/Non cash	12/31

Note 1. Significant Accounting Policies

The financial statements of Idavang A/S are prepared in accordance with International Financial Reporting Standards ('IFRS') as adopted by the EU and additional Danish disclosure requirements for financial statements.

The financial statements are presented in EUR. The company's functional currency is DKK.

The accounting policies applied by Idavang A/S are consistent with those applied by the group, cf. note 1 to the consolidated financial statements and the below.

The accounting policies remain unchanged from previous year.

Revenue

Revenue consists of management fee allocated to subsidiaries in the group and is recognized on a straight-line bases as the services are provided.

Revenue is measured at the fair value of the agreed consideration excl. VAT and taxes charged on behalf of third parties.

Investments in subsidiaries

Investments in subsidiaries are measured at cost. If the cost exceeds the recoverable amount, the carrying amount is reduced to such lower value.

Dividends

Dividends from investments in subsidiaries are recognised in the parent company's income statement in the reporting year in which the dividends are declared.

2

Note 2. Critical Accounting Estimates And Judgements

In preparing the Parent Company Financial Statements, Management makes limited accounting estimates, judgments and assumptions, which form the basis of presentation, recognition and measurement of the Parent Company's assets and liabilities.

Investments in subsidiaries constitute a significant part of Idavang A/S total assets. Indication of impairment of investments in subsidiaries are assessed annually by management. Impairment tests are conducted in the same way as for goodwill in the Group, in the consolidated financial statements. The receivables from group companies are included in impairment tests.

It is management's assessment that no further indications of impairment existed at year-end 2023. Impairment tests have therefore not been carried out for investments in other subsidiaries.

The fair value of receivables in subsidiaries corresponds to the carrying amount in all material respects, as receivables from group companies has market terms.

3

Note 3. Fees Paid To Auditors Appointed At The Annual General Meeting

Audit fees are recognised under administration expenses.

Note 14.

Contingent Liabilities, Securities And Other Financial Obligations

Contingent liabilities

The Company is taxed on a joint basis with its parent, Jast Holding ApS. The Company is thus jointly and severally liable for all tax liabilities under the joint taxation arrangement until and including the financial year ended 31 December 2022.

Securities

The Idavang Group is party of a credit facility agreement with Jyske Bank and Nordic Trustee. Under this agreement, the following assets are held collateral:

- > Receivables from group entities:
 - Idavang Agro LLC (Russia) EUR 132K
- > Shares in:
 - Rus Invest ApS (Denmark)
 - Rurik A/S (Denmark)
 - Idavang Agro LLC (Russia)
 - Idavang Luga LLC (Russia)
 - UAB Idavang (Lithuania)

In addition, the following companies in the Idavang group participate in a cross guarantee to Jyske Bank as the lender of this agreement: all except Russians.

The above mentioned securities have been provided as collaterals for bank mortgages of EUR 82,374 thousand at 31 December 2022.

Other obligations

None

15

Note 15.

Post Balance Sheet Events

No events materially affecting the Company's financial position have occurred subsequent to the financial year-end.
