

**FOR IMMEDIATE RELEASE:**

**March 22, 2023**

**SOUTH TEXAS YOUTH SOCCER ASSOCIATION AND PERRY WEATHER  
PARTNERSHIP TO PROTECT YOUR MEMBERS AND FACILITIES WITH  
MODERN WEATHER SAFETY**

ROUND ROCK, TEXAS – South Texas Youth Soccer is excited to partner with Perry Weather to provide the highest level weather safety platform for all of our members.

Through this partnership, STYSA's members receive an exclusive discount to the Perry Weather platform. Receive live lightning alerts and location-based weather notifications specific to your tailored safety policies.

This special pricing includes a years' worth of protection with: full access for 5 users, web/mobile access, GPS tracking, Custom Policy settings, Real-time lightning tracking, embeddable web widget and more options to include users and add additional hardware.

Free weather apps are great for personal use but are extremely limited for use in schools, organizations and businesses. The free apps will not allow you to build weather safety policies that notify your organization about what actions need to be taken in a weather safety situation or often can be dramatically different than the true conditions on the field or at your exact location.
