

VOX® FORUMS

VOX® FORUMS **168-194**

Introduction	170
Positioning Vox Forums In Conference Tables	171-173
Data/Voice Wiring Options	174
UL – Product Identification	175

“M” SERIES VOX FORUM™ **176-185**

Vox Forum™ Configurator – An On-line Tool	176-177
Guide To Specifying Modular “M & N” Series Vox Forums™	178
“M” Series Vox Forum™ 6” – Order Form	179
“N” Series Vox Forum™ 12” – Order Form	180
“M & N” Series Vox Forum™ – Standard Modular Faceplate Options	181-185
“M & N” Series Vox Forum™ – Custom Modular Order Form	186

“S” SERIES VOX FORUM™ **187-194**

Pre-Wired	187-190
Site-Wired	191-194

"M & N" Series Vox Forums Pages 176-186

The latest addition to the Forum family, "M-Series" Forums – 6" wide and "N-Series" Forums – 12" wide, offer increased capacity and scale. Its modular design makes it simple to configure to your needs

Individual plates can be replaced / retrofitted as required in the field.

"S" Series Vox Forums Pages 187-194

The "S-Series" Forum is available in 2 sizes: 5 1/4" W or 12" W. Preconfigured models from A to I with eight data options should meet most basic requirements.

"T" Series Vox Meeting Forums

Specify this T-series Forum with Meeting Tables on pages 250-251. Available in two sizes: 4 1/2" w and 6" w. Power, voice, and data cables can be detached from this Forum for ease of reconfiguring multiple tables or applying longer cords.

Vox International Forums

For projects anywhere in the world Vox International Forums provide a solution. For specific models and pricing contact Customer Service at **1.800.668.9318**, with the country of destination, and type of power required.

POSITIONING VOX® FORUMS ON CONFERENCE TABLES

DETERMINING FORUM PLACEMENT ON TABLES

The following table is a guideline only for defining/distributing Forums along the table top. The rectangular icons on the left are used for reference only, as all other shapes in the Collection fit within this shape.

For Access Bases & Tower Bases, Forums can be located over the base or not over the base.

For other Custom Forum positioning contact Customer Service at **1.800.668.9318**.

Nienkämper is a **recognized installer** for data systems described in **Vox® Forum products**.

Vox® Forums can be manufactured with several factory wired data systems including "Amp", "Systimax", "Siemon", "Belden", "Ortronics" and "Hubbell." All of these systems guarantee the highest level of data transmissions.

Vox® Forum products have been tested by the independent laboratories of these companies and are compliant with all aspects of proper installation and performance.

Nienkämper recommends the use of these **pre-wired systems** as they offer the **best value, quality** and **safety**.

Options for data/voice connections

AMP

- CAT 5E System
or

HUBBELL

- CAT 6A
(available in custom plate only)

T568A

legrand®
Ortronics

- CAT 5E
or
- CAT 6

T568A

Nienkämper recommends the use of Vox® **pre-wired systems** as they offer the **best value, quality** and **safety** to the consumer.

Standard Vox Forums are listed by Underwriters Laboratories Inc. under several categories. These listings qualify a level of safety guaranteed by UL's published standards for safety which UL uses as a benchmark for testing and listing products.

The right to bear the UL mark is contingent on the fact that absolutely no alteration is made to the product as it was submitted and tested by Underwriters Laboratories. This is to ensure that assemblies are not manufactured with inferior or replacement parts; this would void or alter the result of the original examination and tests conducted by UL.

The UL mark is included on a label that is attached to the underside of listed Vox® products. This label includes:

- The date the component was assembled and tested.
- A serial number for tracking purposes.
- The listing category located under the UL mark.
- UL file number that can be used as a reference at UL for any inquiries about the product.

SAMPLE UL/CSA LABEL

All listed assemblies have POWER/ELECTRICAL components wired by Nienkämper and undergo the following tests:

Production Line Grounding Test - Continuity: This test checks for grounding continuity between the grounding conductor of the attachment plug and the designated main grounding point including any accessible dead-metal parts of the assembly. There must be grounding continuity between all parts.

Production-line Dielectric Voltage Withstand Test - Hi-pot: Each product shall withstand without electrical breakdown, as a routine production-line test, the application of an AC potential at a frequency within the range of 40-70 Hz or a DC potential between the primary wiring, including connected components, and accessible dead metal parts that are likely to become energized. This test is conducted when the product is fully assembled, and cannot be unwired, modified or disassembled afterwards.

Production-line - Polarity Test: This test verifies proper electrical polarity of both the grounded (neutral) and the ungrounded (hot) supply circuit conductors of the Forum and all parts intended to be connected to the grounded (neutral) and ungrounded (hot) supply circuit conductors of the attachment plug. Conductivity indications must confirm the correct connection of all parts specified.

VOX® FORUM CONFIGURATOR

Specifying the “M” and “N” series Vox Forum couldn’t be simpler.

“M” and “N” series Forums can be individually configured online with the **“Vox Forum Configurator”**.

Log onto the Nienkämper website www.nienkamper.com and follow the links or simply type www.nienkamper.com/vfc in your browser and go straight to this online tool.

Configuring your Forum is easy: simply drag and drop the options you want to build the product you need.

VOX® FORUM CONFIGURATOR

ON LINE ORDERING OF VOX FORUMS “M” & “N” SERIES

Once you've tried this amazing and simple tool you will appreciate the ease in which sample configurations can be built. You can create quick budgets, use as information sheets for discussions, meetings and placing orders.

Even custom plate configurations can be instantly selected and priced.

Below is an example of a completed Forum order sheet that can be printed, saved or submitted once the appropriate information has been filled out.

NIENKAMPER VOX FORUM CONFIGURATOR

Order total (list): \$ 2,025

YOUR CONFIGURATION

BASE

Model: MSERIES

PLATE 1

Model: 3P, Pre Wired Power contains the following: Single module faceplate with - 1 duplex power receptacle/ 15A-120V - With 2 USB ports 3 Amp/ 5VDC Type a 2.0 - Pre wired with 10' cord & plug.
2USB ports - Type 2.0 rated - 3 Amp/ 5VDC.

PLATE 2

Model: 7V, Single module blank faceplate

PLATE 3

Model: 1E, 2 - AMP CAT6 DATA, 10' cord

COMMENTS:

quantity 3 required

*Required fields

It's easy to specify your own "M" or "N" Series Forum:

- 1 Create the Forum model number by selecting modular faceplates from pages 181-185.
- 2 Fill in each 2 digit faceplate model number in the desired position on page 179-180.
- 3 Fill in the corresponding price for each modular faceplate in the correct position. Total the cost.
- 4 For custom modular plates, use model number "CX" for each custom position. If there are more than one custom plate layout, label them CX1, CX2, etc. Create the custom modular plate and list cost on page 186, and transfer plate # and cost to page 179-180.
- 5 Sign and date the form, forward to Nienkämper with your request for quotation or purchase order.

CX	80

DESCRIPTION
To build your Forum, select fittings from page 186.

HOW TO ORDER

- 1. From the list of jacks select the part number that describes your selection
- 2. Place the part number in one of three positions on the faceplate illustration “A”, “B”, or “C”.
- 3. Fill in the associated List \$ of each fitting - total the cost.
- 4. Fill in the model number and transfer it to the proper position on the Forum order page 179 (6" Forum) or page 180 (12" Forum).
- 5. Add each modular plate price to complete the total Vox Forum list price.

Complete this for each custom plate required.
