

Numberblocks Scavenger Hunt

What you need: Numberblocks One to Five blocks

How to play: Choose a Numberblock and hide all its blocks in different places around the room. Tell your child which Numberblock is hiding and challenge them to find all of the blocks, counting as they go. Ask or tell them how many are still missing each time. If they get stuck, give clues using position words such as behind, next to, under, in front of, near.

Add an extra challenge: Show them all the Numberblocks except the hidden one and ask who is missing. Use "getting warmer/colder" clues to tell them when they are near or far. Or control them like a robot: "Five steps forwards. Turn. Look down." Then let them do the same for you.
