

GRAYLOG CLOUD

You get the insights, we'll get the infrastructure

POWERFUL, FLEXIBLE, AND SEAMLESS CENTRALIZED LOG MANAGEMENT EXPERIENCE WITHOUT THE BURDEN OF OPERATIONAL AND INFRASTRUCTURE COSTS.

 <p>99.9% UPTIME SLA OF 99.9%</p>	 <p>AICPA SOC 2 ACTIVE SOC2 TYPE 2 COMPLIANCE</p>	 <p>24/7 24/7 OPERATIONAL SUPPORT</p>	 <p>90 90 DAYS LIVE STORAGE</p>	 <p>1 YEAR OF ARCHIVAL DATA <small>(option to purchase additional years)</small></p>	 <p>AUTHENTICATED AND ENCRYPTED DATA TRANSFER</p>
---	---	---	---	--	---

INVEST IN INSIGHT, NOT INFRASTRUCTURE

COMPREHENSIVE

Horizontally scale to meet any size workload from a gigabyte to petabytes per day. Built in fault tolerance enables distributed and load-balanced operations to prevent data loss. Our comprehensive procession algorithm to parse logs and search through virtually unlimited data.

FASTER TIME TO VALUE

Focus on the day-to-day log management activities and maximize value from your resources while Graylog manages the infrastructure, health, and performance of the application. We provide dedicated Cloud environments for each customer, in-transit data encryption, and different options for encryption at rest. In less than two days, you can be live on Graylog Cloud and we'll take it from there.

EASY EXPLORATION

Graylog lets you analyze data without having to know exactly what you are looking for before querying. Graylog expands and reveals more information as you go, delving deeper into the search results to explore further to find the right answers.

INCREDIBLE FLEXIBILITY

Graylog is built to open standards for connectivity and interoperability for seamless collection, transfer, storage, and analysis of log data. We now centrally manage any machine data collector—ours, custom, or 3rd party vendor—from the admin console, including stopping or starting any whitelisted system processes. Not only that, we can collect other structured data as well, such as DNS lookups from the wire.

RIDICULOUS SPEED

When working with enterprise-scale data, every second—or millisecond—matters. The longer it takes to analyze data coming in, the longer it takes to find and resolve issues. Graylog lets you search and investigate multiple issues at once with multi-threaded data retrieval, saving considerable time and delivering results much faster.

VALUE FOR EVERYONE

Make repetitive tasks and routine investigations efficient, ensure consistency, and empower less technical members of the team through dashboards and saved searches.

WE'VE GOT YOU COVERED

POWERFUL, LIGHTNING FAST FEATURES

ARCHIVING

Store older data on slow storage and easily re-import it into Graylog when you need it.

CORRELATION ENGINE

Get email, text, Slack, or other message type alerts on single, combined, or missing events.

LOOKUP TABLES

Perform faster research by adding WHOIS, IP Geolocation, threat intelligence, or other structured data.

REST API

Easily integrate your data into 3rd party systems to automate reporting, workflow and research.

STREAMS

Categorize log messages in real-time to easily target queries, reports and dashboards for faster results.

AUTOMATIC ALERTS

Receive alerts via email, text, Slack, and more. Update alert criteria based on a dynamic list in a lookup table.

DATA FORWARDER

Send your encrypted and authenticated messages from any location to your Graylog Cloud instance.

PARAMETERIZATION

Enter one or more criteria for a more comprehensive search. Easily save and share regularly run searches.

SCALABLE SEARCH

Build complex queries in minutes with Graylog's web console—no proprietary query language needed.

TEAMS MANAGEMENT

Control entity access and capabilities. Includes LDAP/Active Directory integration.

CONTENT PACKS

Share configurations of extractors, inputs, pipelines, dashboards and more. Move easily from Test to Production.

INTERACTIVE DASHBOARDS

Combine widgets to build customized data displays and automate the delivery of reports to your inbox.

PIPELINES

Set rules for data processing to ensure the right parser, data enrichment and lookup table(s) are applied.

SEARCH WORKFLOW

Build and combine multiple searches for any type of analysis into one action and export results to a dashboard.

USER AUDIT LOGS

Track who accessed what log data and what actions they took against it to ensure compliance and security.

ABOUT GRAYLOG

Graylog is a leading log management solution that hundreds of thousands of IT professionals across the globe rely on every day. With a focus on security, compliance, operations, and DevOps, Graylog delivers a better user experience by making analysis ridiculously fast and efficient using a more cost-effective and flexible architecture. Purpose-built for modern log analytics, Graylog removes complexity from data exploration, compliance audits, and threat hunting so users can quickly and easily find meaning in data and act faster.
