

HENRIETTA EBBS

BA (H) TEXTILE DESIGN

A designer with a passion for sustainable design, Henrietta Ebbs has developed a collection of knitted fabrics inspired by floral forms. After reconnecting with the natural environment during the pandemic, 'Restorative Transformations' explores nature's forms and textures, using soft movements in knitted processes to create a soothing commercial knitwear collection. Influenced by the restorative colour movement, the nurturing hues used within the collection aim to provide inner calm during this uncertain time. The collection is a collaboration of trans seasonal design, subtle formations, recycled fibres and timeless appeal. With sustainable principles at the forefront of every decision as a designer, Henrietta hopes to bring these concepts to future design projects.
