

HEITUNG KWOK

BA (H) FASHION DESIGN

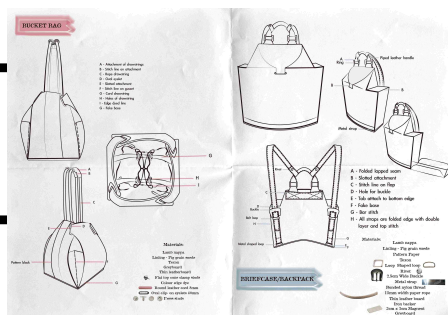

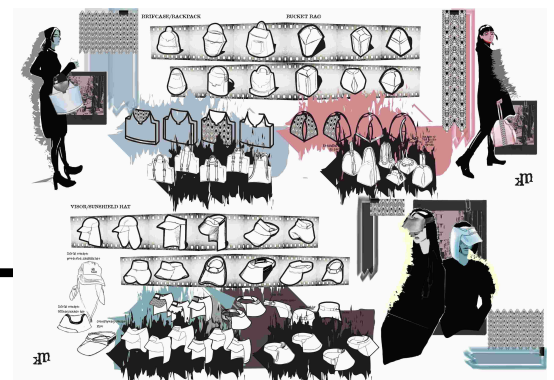

A self developed fashion accessory designer, passionate about making products which are quiet, quirky and visually delicate, showcasing art with utility. The materials used are meticulously selected to evoke layer upon layer of analysis and meaning. Also aspiring to associate with fashion design and stylist work. In final project, expressing nostalgia in a sense of security to rely on, transformed it from subconscious to actual designs related to protection. And screening out the truly special things that spur to myself which draws on the disappearing but very authentic Hong Kong culture, corner house. From this research I gathered shapes, patterns to take forward into my own designs. And metal hardware give to modernize and complimenting tying together the finished look.
