

NATHAN EARL

BA (H) GRAPHIC DESIGN

Hello. I'm Nathan, a multi-disciplinary designer with interests in branding & identity as well as editorial design. Throughout my time at university, I've seen myself overcome personal challenges, such as can be seen in my 'Torschlusspanik' book project where I overcame fears relating to a design brief – through this I believe I've developed massively as a designer and hope to continue in this way throughout my career. My design preferences are related to digital platforms, like the creative cloud suite, where I am very experienced in their software – from Photoshop to After Effects etc. I also thrive in typographic based work as I thoroughly enjoy working with type and grid systems in a Swiss Design style – however, I am not afraid to face new challenges and step outside of my comfort zone to learn and improve my craft.
