## BA (H) PHOTOGRAPHY

---

The medium of photography has always acted as a tool of reflection for me. In my most recent project, I use photography to explore themes such as family, childhood and memories. Over the past year, my eldest brother Tom, a young man with ASD (autism spectrum disorder), has become my main inspiration for creating work. I focus on my own personal experiences of growing up and seeing Tom see the world around him. Throughout the project, I create fanciful and nostalgic imagery that both celebrates and embraces childhood and diversity.
