

ANNABELLE BARLOW

BA (H) FASHION DESIGN

I am a graduate with a strong interest in sustainability. In my recent project 'organically armoured' I have been working to design a long term and sustainable collection while also embracing seasonal trends and colours. Researching and problem solving have been my favourite parts of my time at university, and this is something I would like to focus on in my future career. I am a very independent and organised individual and I have used these strengths throughout my final year to plan and organise my time effectively to design and manufacture my collection on time and to a high standard. I also really enjoy working collaboratively as a team, in second year I did this well for an industry brief for River Island, where we collaborated effectively to present a sustainable range to a River Island accessories designer. Outside of my course I have enjoyed fencing with the university.
