# LOCATIONS MANAGER

BY FYB PTY LTD

The FYB Locations Manager provides systems administrators with an intuitive console for managing and maintaining locations within OpenText Content Manager

Using the FYB Locations Manager will provide the following benefits:

f
y
b

- ▸ Reduces the time required for systems administrators to manage locations, saving costs with support and administration of the system
- ▸ Minimises duplication of locations, thereby increasing data quality
- ▸ Ensures information is associated with the correct locations, improving information accessibility and compliance

Version 2.3.X Features

▸ Intuitive console providing quick access to functionality and a summary of all locations

▸ Provides match, retrieve and review features; enabling systems administrators to make an informed decision about the clean-up process

▸ Ability to delete locations without an email and not associated with any record

▸ Ability to merge locations with matching existing locations

▸ Ability to convert unknown locations to known locations quickly and easily

▸ Ability to identify duplicate locations, then match and merge the locations efficiently

▸ Ability to show locations with an internal email allowing you to delete, merge or create an internal location

▸ Ability to identify locations that should be attached to an organisation and associate them quickly and efficiently

▸ Manage Internal Locations including license assignment and profile or position setup in relation to security

▸ Locations can be converted to internal or external locations

Prerequisites

▸ Content Manager 10x, 10.1x

▸ Internet Information Services 10.0 and above

▸ The following browsers are supported:
  - Google Chrome
  - Mozilla Firefox
  - Microsoft Edge

▸ An account with at least read access to the Content Manager database

▸ Locations Manager must be installed on a Content Manager workgroup server
