PAGE2CM
BY FYB PTY LTD

The FYB Page2CM connector automatically transfers documents from PageUp into relevant employee and position folders in OpenText Content Manager

Using the FYB Page2CM will provide the following benefits:

- ▸ Leverages the investment you have made in PageUp by removing manual capture processes and reducing operational costs

- ▸ Ensures your organisation is meeting its record keeping compliance requirements for the storage and management of documents and records within Content Manager

- ▸ Reduces the duplication of information stored in multiple places, increasing data integrity and providing efficiencies to users for the retrieval of information
