

FYB POWER2CM

Course Duration

1 ½ hours

Delivery Mode

Remote training session via Microsoft Teams

Training is delivered within your environment to contextualise the training to your setup and build version

The training session will be recorded and provided upon conclusion of training for your reference

Pre-requisites

Content Manager Introduction and Intermediate

Audience

Suitable for Content Manager Administrators.

This training course allows you to have up to a maximum of 10 trainees to attend.

Overview

This training course provides attendees with an understanding of how FYB's Power2CM can be used to capture information from social platforms automatically into Content Manager.

Attendees will learn how to view Power2CM configuration settings and archive information captured within social platforms and gain an understanding of how Power2CM can be utilised to create flows with other applications.

Topics

This training course will cover the following:

- ▶ Locating and modifying configured document templates
- ▶ Performing manual archives and modifying automatic occurrence periods
- ▶ Reviewing and understanding the setup of Flows relating to Content Manager
- ▶ Reviewing and understanding output of flows in Content Manager
- ▶ Understand how Power2CM can be utilised to capture information from other applications

Please note that the provision of training materials or digital handouts are not included in the training. However, online help guides are available to reference and quotes for custom training materials can be provided upon request.
