

BELTING FOR THE PRESORT MAILING INDUSTRY

The Nitta Advantage

Nitta Corporation of America offers many different belting options for the various applications throughout presort mailing facilities. Nitta belts are time-tested and have been proven to outperform the competition. These high quality specifications result in longer life and better cost of ownership / return on investment.

Nitta offers a complete belting solution for the presort mailing industry, including nylon core skive-splice, finger-splice, seamless belts, conveyor belts and tools.

Belting for Presort Applications

Nitta's extensive line of belting products covers key machines and applications in presort mailing, including:

- ▶ **Vacuum Feed Belts**
- ▶ **Drive Belts**
- ▶ **Stacker Bin Belts**
- ▶ **Transport Belts**

Nitta products for the presort mailing industry include:

- ▶ **PolyBelt™** – Super-strong nylon core, extended-life skived joining, high operating duty cycles.
- ▶ **PolySprint™** – High-strength polyester core, finger-spliceable quick-melt urethane, easy installation. Greatly reduces costly downtime as a quick and easy-to-replace alternative to skived products.
- ▶ **SEB™** – Seamless (truly endless) belts, integrally molded with highly accurate dimensions, achieving high rotation precision and durability.
- ▶ **Conveyor Belting** – Hundreds of configurations, wide variety of surfaces. Extensive selection of PVC, PU, nylon, high duty and unsupported belting, plus many modification options such as guides, cleats and holes.

Made in the USA

PolyBelt is proudly “Made in the USA.”
