Special Characteristics:

ZipLink is a breakthrough in belting design that combines time tested rubber cover materials with a structured spiral mesh than can be easily spliced at any length into a continuous belt without the need for special tools. ZipLink's construction eliminates points of weakness because there is no loss of strength at the splice area. The recommended working tension of all ZipLink belts is 150lbs/in with very little stretch to the polyester mesh. This belt is stocked at 72" wide and can easily ship within 3 working days.
