**Special Characteristics:**

Our 108CL belt is regarded as our top of the line urethane belt for eddy current, meat preparation, deboning, metal stamping, optical scanning and automotive applications. The 108CL has a 1.6mm thick top cover at 92 durometer shore A rating which offers extremely high wear characteristics suited for stamping applications or conveying metal parts in the automotive industry. This belt offers high dimensional stability across the weft that allows a completely flat belt on the conveyor system, the intermediate layer is also made of high grade urethane for finger over finger splices. Complies with FDA regulations and EU recommendations for the transport of foodstuffs, regulations include 1935/2004/EC and 2023/2006/EC.
