WG NIJ Walk Through Metal Detector Test Kit for NIJ 0601.02

The objects and tests in this kit are designed to maintain and improve the security of correctional facilities and public buildings, and to increase the safety of security personnel.

Both the field test kit and the test kit for have been manufactured for computer/automated testing.

These kits are particularly effective for random testing of operator alertness and training of new detector operators. Kits comply with NIJ Standard 0601.02 "Walk-Through Metal Detectors for use in Concealed Weapon and Contraband Detection" which was the result of extensive consultation with the law enforcement and correction communities.
