## WG 4 Under Door Camera

The WG4 Under Door Camera is suitable for use in total darkness, it has a black and white camera with a wide-angle lens which provides superb room coverage.

The camera is built into a 5.6mm insertion plate with 28 LED's 940nm wavelength that are completely invisible to the human eye. It has a USB connection allowing it to be connected to a tablet, PC or a smart phone.

The images are viewed using AMcap universal viewing software, this creates JPEGS and MPEGS meaning no awkward file conversions are required after use. It is available with or without our recommended Conker NS8 ruggedised Windows 10 tablet PC. The unit is powered by an internal battery. This unit is available with or without our recommended Conker NS8 ruggedized Windows 10 tablet PC. The WG4 is the obvious choice for a cost effective 'point and shoot' under door viewing solution.
