The WG EOD Search Kit

The WG EOD Search Kit is contained in a single backpack, for use by 2 man search teams, the kit provides significant capability whilst minimising weight and bulk.

All the search tools have under gone rigorous testing, and are already in use by National Armies, Police squads and other units involved with safe keeping operations.

Designed as a single backpack, to be used by 2-man search teams, the kit provides significant capability whilst minimising weight and bulk.

Additional space is available in the backpack for teams to enhance the contents with their own equipment.

It has been designed and developed by a serving senior UK EOD operator.

The kit provides capability in the following areas:

- Access,
- Hook & Line
- Identification and diagnosis,
- Reconnaissance and survey,
- Search and location,

The modular design of the kit allows the contents to be adapted to suit different scenarios.

STANDARD FEATURES

- Innovative lightweight hook and line system,
- Advanced metal detection,
- Advanced take down mine prodder,
- Search equipment,
- Modular construction.
- Anti tamper security seals, with 'US ARMY', or appropriate identification
- IED guide

RECONNAISSANCE AND SURVEY

- Binoculars
- Waterproof note book and pen
- Waterproof map case
- Digital voice recorder
- Digital Camera (2M pixel min.)

SEARCH AND LOCATION

- Mine prodder, with collapsible hand protection
- Metal detector
