WG Signature ID System

Developed specifically for the Events Industry using state-of-the-art technology, the Signature ID System allows for quick and easy identification and control of delegates throughout an event.

Full-colour Smart Badges with integrated RFID (Radio Frequency Identification) circuits allow delegates to access information and sessions by placing their badge over hand-held devices or stylish kiosks. Interactive seating plans, flight and transfer details and any custom information can be accessed instantly.

Event organisers have total management of sessions and attendance with live reporting and the ability to adjust settings on demand.

SMART TABLET SYSTEM

The only system on the market to offer the flexibility of a tablet computer with the control of a dedicated response system. Simple or complex voting scenarios can be implemented using 'drag and drop' for ordering lists.

With full branding and a custom menu structure available, you can provide your delegates with a device tailored to the exact requirements of the event. Speaker bios, delegate lists and live agendas are just some of the features available.

A simple-to-use messaging feature integrated with our Message Gateway allows for constant interaction between the audience and the organisers throughout the event.
