WG Intruder Security Fog System

The WG Intruder Security Fog System on activation provides a dense fog into the protected area, almost instantaneously leaving the entire area visually impenetrable and stopping criminals in their tracks

The system will deliver hundreds of cubic metres of dense fog per activation in seconds.

Security Fogging is an effective way to protect assets and an effective way to prevent intruders entering further into a property.

The fog is completely harmless to both humans and animals and will not damage property or furniture.

It can be installed as stand-alone units or with the WG Intruder Security Sound System and / or the WG Intruder Security Light System.

It can be easily connected to existing alarm system.
