WG Intruder Security Sound System

The WG Intruder Security Sound System provides high-intensity 127db of sound that will disorientate and confuse intruders forcing them to seek an exit.

It provides a very effective sound barrier guaranteed to repel even the most determined of intruders.

On activation, the scientifically- developed pulse of sound leaves the protected territory inhospitable, debilitating and causing aural pain to intruders and forcing them to seek immediate exit.

It is highly effective yet complying with legal sound level requirements.

It can be installed as a stand-alone security system or, for more effect, with the WG Intruder Strobe Security Sound System and/or the WG Intruder Security Fogging System.

It is also highly resistant to potential tampering by intruders, criminals will find it extremely difficult and time consuming in trying to remove or deactivating it.

It is housed in a virtually indestructible steel body and equipped with tamper switches and integrated Lion batteries.

Reliable effective operation, with backup batteries in the event of mains electricity failure.

It is easy to install and its aesthetically pleasing design is suitable for commercial or residential properties.

SPECIFICATION

- Power supply: 10-18 VDC, 250mA (12.5 VDC charge on)
- Sound output level: up to 127 dB
- Efficiency: up to 200 m3 (80 m2 x 2.5m)
- Alarm signal: Positive (10-14 V, 5 mA) or negative inputs (0-0.3 V, 5 mA)
- Battery: 2,500 mAh
- Full charge time: up to 8 hours
- Battery life time: up to 3 years
- Dimensions: L300 x W180 x D45 mm
