WG Intruder Strobe Security Light System

The WG Intruder Strobe Security Light System provides high-intensity white light pulses, that will disorientate and confuse intruders, effectively leaving them unable to see and forcing them to seek an exit.

It provides bright pulses of blue and red to imitate police lighting to disorientate intruders.

The combination, of white, red and blue lights frequently evoke a Pavlovian response among criminals, they associate the lights with the police and causing them to behave irrationally and to make mistakes, thereby leaving them more likely to be caught.

It can be installed as a stand-alone security system or, for more effect, with the WG Intruder Security Sound System and/or the WG Intruder Security Fogging System.

It is also highly resistant to potential tampering by intruders, criminals will find it extremely difficult and time consuming in trying to remove or deactivating it.

It is housed in a virtually indestructible steel body and equipped with tamper switches and integrated Lion batteries.

Reliable effective operation, with backup batteries in the event of mains electricity failure.

It is easy to install and its aesthetically pleasing design is suitable for commercial or residential properties.

SPECIFICATION

- Alarm signal: Positive (10-14 V, 5 mA) or negative inputs (0-0.3 V, 5 mA)
- Battery life time: up to 3 years
- Battery: 2,500 mAh
- Dimensions: L300 x W180 x H45 mm
- Efficiency: up to 175 m3 (70 m2 x 2.5m)
- Full charge time: up to 8 hours
- Power supply: 10-20 VDC, 250mA (12.5 VDC charge)
