WG Pedestrian Turnstile Full Depth Arm

The WG Pedestrian Turnstile Full Depth Arm - provides a versatile solution for controlling pedestrian entrance or exit to any location.

- It is available in single left- and right-hand opening modes or double interconnecting units
- Its simple design presents a secure and stylish solution that compliments many locations, particularly those with high levels of pedestrian traffic.
- It can be integrated with a variety of control systems from a simple manually operated push button to more sophisticated fully automatic ultrasonic, overhead sensors or auto sensor devices.
- It can be connected to bespoke control systems e.g. fire alarm, computer system, etc.
- It will automatically reset from the breakout position within 3 seconds.
- The breakout force required can be varied between 60-180 newton metres to suit environments.
- It has in-built intelligent software that activates a 'sleep mode' if it cannot perform a function after 3 failed attempts.
- Optional full depth arm with Perspex infill panel, suited to leisure / corporate environments as it has the added benefit of being fully DDA compliant as it offers full access to disabled users.
- The emergency breakout facility can set up to activate an alarm and/or flashing top light to notify staff.

FRONT SENSOR OPTIONS

- Auto Sensor
- Double front photocell eye
- Overhead Sensor
- Single front photocell eye

DESIGN

- 10rpm motor, which fully opens the gate in 3 seconds
- Build Options: Mild steel, Chrome plated, Satin chrome, Polyester powder coated to a choice of RAL colour or 304 grade stainless steel
- Can be easily integrated with railings/barriers providing the same look and feel throughout the desired area
- Can be set to open at either 180 or 90 degrees.
