WG Rail Battery Backup

For Access planning, safe work planning, incident management and hazard direction.

When it comes to the safety of people working on or near a rail line or travelling from the authorised access point and along the authorised walking route to get to the railway, or just marking an area of danger then The WG Rail Battery Backup offers the complete solution. This fast, efficient, easy to use product reduces time and allows the user to move more quickly onto the next task.

The WG Rail Battery Backup or the 110v battery backup is the simple solution to all your marking/cordoning needs. Users have commented that its long battery life and lightweight, yet robust construction allow it to be used for many different applications. In summary some of the benefits of the Battery system are: flexible light source, low running cost, battery powered, long illumination times.

The WG Rail Battery Backup is available in four colours as standard - Blue/Green Lime, orange or Red.
