Overview

The Contact Free Sanitisation Mist Station is designed to be unobtrusive in a wide variety of environments due to its compact and sleek design.

Manufactured to EU specification and requirements the WG contact Free Sanitisation Mist Stations are an excellent addition to a variety of settings and locations.

The simplistic design and colour variants ensure the sanitisation stations never look out of place, whether located in an airport, cafe or corporate office.

Features

Safety – Contact free dispensing, no contact points.

Large Capacity – Heavy duty connectors for maximum cable life.

Free Standing – Permanently place, or relocate to your desired location.

Own Branded – For no additional cost, our Contact Free Sanitisation Mist Station can be branded to suit your business or application

Made in the EU – Manufactured to the highest standard, meeting all relevant CE requirements.

Mess Free – Removes the requirement for bottles and paper towels – creating a clean space for users to sanitise their hands

Contact Free Sanitising Mist Station

Advanced Aesthetics, large stockholding

The Contact Free Sanitisation Mist Station has been designed to remove the unsightly clutter from entranceways, meeting rooms and communal areas. Delivering over 16,400 applications per refill, the station requires little or no maintenance.

Our sanitisation system comes equipped with LED lighting, further adding to the aesthetics and creating a visual focal point to ensure users are aware of the sanitisation station upon entering your business.

The system is available branded to your needs, a large stockholding ensures we are able to fulfil the largest of orders with a short turnaround time – enabling fast and consistent deployment across your brand.
