WG 153 Bomb Disposal Search Suit

The WG 153 Bomb Disposal Search Suit has been designed specifically for personnel involved in searching for and the clearing of mines and terrorist explosive devices.

Although the Search Suit does not offer the higher protection of the WG 5 EOD Bomb Disposal Suit, it is much lighter in weight, provides all-round 360° protection, whilst at the same time being comfortable to wear and allowing virtually un-restricted movement.

The outer material of the Search Suit is constructed of fire-retardant Kermel and includes the latest Kevlar new technology aramid fibres.

The Search Suit contains a pocket in the front and back into which an optional fragmentation plate can be inserted. This upgrades the level of protection provided by the Search Suit.

STANDARD FEATURES

- Arms: Separate adjustable sleeves provide optimum movement
- Groin Protector: Provided by the trousers
- Jacket: Provides front, back, side, shoulder and neck protection, with the addition of up-armouring pocket for inserting optional ceramic plates
- Trousers: The unique design provides freedom of movement and optimum protection to the legs
