Designed to handle vehicles of all sizes

Weather resistant

3000 mm long

Overview

The WG Portable Roll Up Speed Bump is a high quality, portable Speed Bump that is able to roll up for easy movement.

The portable speed bump has all the same benefits as stationary speed bumps, with the added advantage of being able to roll it up and move it to different locations.

The WG Portable Speed Bump is weather resistant and is constructed out of plastic sections with a padded rubber bottom to prevent skidding.

The speed bump comes with a convenient storage bag, making it very easy to transport from location to location. This means that it is useful for traffic control measures in places that a permanent solution is unnecessary.

The features of the WG Portable Speed Bump make it an ideal traffic calming solution for schools, sporting events, construction sites and road blocks.
