

Continuous Handrail

UV-C Sanitising Module

Product Code: 3570-24

WESTMINSTER
GROUP PLC

Key Features

Continuous Handrail Disinfection

Up to 99.99% Disinfection

Kills Covid-19 & other microorganisms

People Safe

No Electrical Power Required

Easy & Quick to Install

Overview

Escalator Handrails are typically used by hundreds of people every day, and so they can be a major source of spreading diseases such as Covid-19.

The Continuous Hand Rail UV-C Sanitising Module is an ideal product for the automatic continuous sterilisation of escalator handrails located in transport hubs, shopping malls, shops, supermarkets and offices etc., preventing the spread of diseases.

It uses UV-C 265 nm wavelength light to effectively kills Coronavirus Covid-19 and other deadly microorganisms, it destroys and changes the structure of DNA and RNA in living cells

The modules are self-powered, using the escalator handrail to provide the required energy.

The modules can be easily and quickly fitted to existing and new escalators.

Features

Continuous Hand Rail Disinfection

99.9% Disinfection

Self Powered

Fit to Existing & New Escalators

Easy and Quick to Install

Does not interfere with escalator operation.
